TO OPERATE The SPYX MOTION ALARM- Motion Detector

Place Motion Alarm near a place where you think people may walk, like a door or a hallway.

- The alarm works best in bright light.
- Turn on the alarm to position #M (Motion Detector). The red LED will flash after 3 seconds to show that the alarm is ready to go!
- If alarm does not sound, it could be because it needs a bit more light in the room. Test the alarm by moving your hand in front of the beam.
- The alarm will sound for 2 to 3 seconds show you that the alarm is set.
- After turning the alarm on, the alarm will reset automatically.
- Turn alarm off when not using to make the batteries last longer.

TO OPERATE The SPYX MOTION ALARM- Vibration Detector

Place Motion Alarm in or on anything that you want to protect (example: a book or backpack)

- The alarm works in any light conditions.
- Turn on the alarm to position #V (Vibration Detector). The red LED will flash after 3 seconds to show that the alarm is ready to go!
- Test the alarm by picking up or moving the object that the alarm sits on
- The alarm will sound for 2 to 3 seconds show you that the alarm is set.
- After turning the alarm on, the alarm will reset automatically.
- Turn alarm off when not using to make the batteries last longer
