1 INTRODUCTION

The trade agreement between Salling Group and supplier is the foundation of cooperation, and contains terms and conditions, both parties must adhere to.

The purpose of the Textile Supplier Manual at hand is to gather valuable information and specific textile requirements and make it easily accessible to suppliers.

We expect that all suppliers will read the manual thoroughly and comply with mentioned requirements and specific standards for Salling Group Textile Department. The supplier is responsible for keeping updated with the Textile Supplier Manual. Any adjustments of the content will be announced by email.

Furthermore the manual at hand should be used for reference if doubts and questions arise. When “CTRL” key is held down and “F” key is pressed, a pop-up box will allow you to search the document for specific words or phrases.

The manual for textile suppliers at hand is not exhaustive. Other documents of special attention, that suppliers are expected to read and be in compliance with:

- Packaging Instructions – Nonfood (applies to textile suppliers)
- Safety in children’s wear
- Policy on animal welfare for textile
- amfori BSCI documents
- Responsible Sourcing Policy

All above documents, except the Responsible Sourcing Policy, can be found via this link: <https://sallinggroup.com/en> – scroll to bottom of the page and click on Suppliers.

You will find our Responsible Sourcing Policy via [Policies \(sallinggroup.com\)](https://sallinggroup.com/en/policies)

Salling Group, Textile Buying Department consists of the following offices:

- Men’s wear
- Women’s wear
- Sport
- Underwear
- Children’s wear
- Accessories
- Shoes

Please feel free to contact Salling Group, Textile Buying Department in case of any doubts or further questions.

2 CODE OF CONDUCT

During the term of the Agreement, the Supplier must at all times comply with the principles and values of Salling Group's adopted Code of Conduct, amfori BSCI, or equivalent.

Additional to this it is important that the supplier stay abreast with and follow the requirements of Salling Group's Policy on Responsible Sourcing. The current version is available at [Policies \(sallinggroup.com\)](#)

2.1 THE INTERNATIONAL ACCORD | The Bangladesh Program

Salling Group is a member of the International Accord's Safety program in Bangladesh. The Accord promotes workplace safety through independent safety inspections, training programs, and a complaints mechanism for workers.

If the supplier is sourcing ready-made garment (RMG) from Bangladesh it is important that the supplier contacts Salling Group's Responsible Sourcing Team (via responsible@sallinggroup.com) before any order is agreed with the buying department.

The supplier is obliged to sign a supplementary agreement concerning the obligations linked to the Accord's, or RSC's work. Once you have contacted the Responsible Sourcing Team this agreement will be shared together with other relevant guidelines.

Note that any RMG producer located in Bangladesh must be pre-approved! The assessment and approval of a producer is carried out by the Responsible Sourcing Team.

It is expected that the supplier takes full responsibility for selected production sites, and that potential non-compliances in relation to Accord/RSC findings are properly acted upon.

If the supplier should need to end a business relationship with an earlier registered/approved RMG Bangladeshi producer, the Responsible Sourcing Team must be duly notified.

The supplier is welcome to contact the Responsible Sourcing Team with questions to the above:
responsible@sallinggroup.com

3 ORDER INFORMATION

3.1 TYPES OF ORDERS

3.1.1 NEVER OUT OF STOCK/FORECASTING & REPLENISHMENT ORDER

Never Out Of Stock¹/Forecasting & Replenishment² are order types for garments, which are to be repeated and where SAP will monitor sales of the product and calculate – based on a number of factors – when a new order should be placed.

The NOOS/F&R order will be placed semi-automatically with same price, quality, composition, terms and conditions as previously agreed between Salling Group buyer and supplier.

3.1.2 NEGOTIATED ORDER

For this order type Salling Group Buyer will negotiate with supplier, what terms and conditions should apply. Once an agreement has been made on net price, quantity, quality, composition, etc. buying department and Goodsflow department will manually place the order accordingly.

3.2 SAP ORDER SHEET

For both types of orders supplier will receive SAP order sheet. For NOOS/F&R orders this is the only order sheet that will be sent. SAP order sheet is also referred to as PO form or EDI (Electronic Data Interchange).

3.2.1 CONTENT

In the SAP order sheet supplier can find PO number, article number, quantities, price, ETD/ETA, composition, terms and conditions.

Supplier is expected to carefully read the SAP order sheet and comply with the requirements set therein.

Supplier must contact relevant buying department without undue delay, if they have any questions or in any way disagree with the content of SAP order sheet or if they will not be able to keep deadlines or ETD.

3.2.2 ORDER CONFIRMATION

Supplier must confirm receipt of the SAP order sheet via mail to Salling Group Vareflow (Goodsflow) department vareflow@sallinggroup.com.

3.3 PDF ORDER SHEET

When the negotiated order has been placed, it will be sent from Salling Group Vareflow (Goodsflow) in PDF format. In this order sheet, supplier can find information, specifications and requirements that apply to the specific style.

3.3.1 CONTENT

The PDF document has several sections with different information. In the next paragraph you can find a list of the content that can be found in each section. Not all paragraphs are relevant for all orders.

Supplier is expected to carefully read the PDF order sheet and comply with the requirements set therein.

Supplier must contact relevant buying department without undue delay, if they have any questions or in any way disagree with the content of PDF order sheet or if they will not be able to keep deadlines or ETD.

3.3.2 ORDER INFORMATION

At the top of each page in the PDF order sheet supplier can find:

- Order no.
 - The purchase order number³ is unique for the order, and in communications between supplier and Salling Group PO will usually be used.
- Article text
 - A text to identify or describe the article. The different buying departments have different standards for this text in order for stores to easily identify the articles.
- Vendor name
 - Name of supplier
- Style number

¹ Never Out Of Stock is abbreviated to NOOS.

² Forecasting & Replenishment is abbreviated to F&R.

³ Purchase order number is abbreviated to PO.

- A unique number generated by Salling Group software; used internally in Salling Group to identify a garment.

3.3.3 GENERAL INFORMATION

- Brand
 - In Salling Group textile department we have several different private label brands, and the brand will usually be mentioned on the hangtag on the garment.
- Style name
 - The different buying departments have different standards for creating the style name.
- Shipment date
 - The required Estimated Time of Departure (ETD).
- Delivery date
 - The required Estimated Time of Arrival (ETA).
- Net price
 - The net purchase price agreed with buyer and supplier.
- Retail price
 - The retail sales price.
- Vendor Ref no.
 - Only used occasionally, if the vendor has a specific reference number for the style before order placement. Often it will be left blank.
- Breakdown of color/size split
 - The ordered quantity is split into quantities per color and sizes, with information about the article number and the EAN⁴/GTIN⁵ to be used on the article and/or the carton.
 - Supplier
 - See paragraph [ASSORTMENTS](#).

3.3.4 DEADLINES

- Required samples for the specific order and the deadlines for receipt at Salling Group Head Quarters.
 - In the paragraph [SAMPLES - GENERALLY](#) in this manual, the different types of samples are described.
 - It is of great importance that the deadlines for samples is kept. If supplier suspects or sees issues, they must inform buying department at once, in order to find a solution together.
 - As per trade agreement Salling Group is entitled to cancel orders where deadlines are not kept.

3.3.5 PLEASE NOTE!

In this paragraph supplier can read about:

- Notes on ORDER INFORMATION / QUALITY REQUIREMENT / SUPPLIER INFO / PACKING INFORMATION INCL. FOLDING INSTRUCTIONS
- Requirements for
 - Foreign suppliers
 - Danish suppliers

3.3.6 WORK SKETCH

Depending on the garment, there can be one or more pages with instructions and work sketches, which will guide supplier to make the garment. There might be information on required trim, lining, color of sewing thread, inspirational illustrations or photos etc. in this paragraph. If garment is to have all over print or specific decoration, it will be shown on these pages of the PDF order sheet.

3.3.7 MEASUREMENT

- Sketch
 - Depending on the garment this area might be blank, or supplier will find a guide to measuring the garment.
- Measurement chart (MMC)

The measurements we expect for the specific garment will be listed here.

In the section [REQUIREMENTS](#) in the manual at hand, supplier will find our general rules on tolerance, manufacturing and workmanship, that applies to all orders.

⁴ EAN is an abbreviation of European Article Number

⁵ GTIN is an abbreviation of Global Trade Item Number

3.3.8 PRODUCT SPECIFICATION

Buying department and/or pattern designers will define what additional specifications should apply to the garment and/or the order.

Supplier will get information on what is required for the order. For instance:

- Is a **hanger** required for the order?
- Which **labels** and **stickers** are needed?
- Which **hangtags** are needed?
- What **specification chart** should apply to the garment?
 - The **specification chart** will also be visible on the last page of the PDF order sheet.
 - Supplier is responsible that the garment:
 - has **properties** in accordance with the specification chart.
 - can pass mentioned **test methods**.
 - can meet the **standards** set in the specification chart.

Please see [TESTING](#) for description of testing process.

3.3.9 CARE AND CONTENT

- Wash and care:
 - It will be defined by buying department, which wash and care symbols should be used on the care label on the garment.
 - If supplier finds that the symbols are not appropriate for the garment, please contact buying department with your valuable input.
 - Please also see [CARE LABEL](#) for more information on requirements for care labels.
- Text on label:
 - Buying department will define the text – in Danish – that should be on the care label and the order in which it should be written.

3.3.10 SPECIFICATION CHART

- The **specification chart** will show the various requirements Salling Group sets for a specific order, such as:
 - Color fastness to
 - Washing
 - Rubbing
 - Perspiration
 - Tear resistance
 - Abrasion resistance
 - Pilling resistance
- The **specification chart** will be visible in the section with product specifications in the PDF order sheet and through web access to [Envision-FTP](#) server. Username and password to the server is in the PDF order sheet.
- Supplier is responsible that the garment:
 - has **properties** in accordance with the specification chart.
 - can pass mentioned **test methods**.
 - can meet the **standards** set in the specification chart.

Below is an example of the layout of a specification chart. The specifications are divided in fabric quality and / or type of garment, e.g. functional outerwear.

Salling Group expects suppliers to make sure garments can comply with these requirements and inform us if they suspect any issues with compliance.

Please see [TESTING](#) for description of testing process.

salling group		Revised: 12.07.2023 Construction type: Woven Items: Garments	Specification No:
+			
Properties/Test Methods/Standards	SG Textile Requirements		
Fibre content, qualitative determination EU 1007	Report Actual		*

Tear resistance, EN ISO 13937-1/Cor 1	Tearing of warp and weft yarns:		X

4 ASSORTMENTS

Based on the layout and information in the assortment/breakdown under general information in the PDF order sheet, supplier can find the requirements about colour/size combination and how the cartons for the specific order should be packaged. Please be aware that our orders can be packed in different assortments. See the variants below.

Please follow Salling Group’s Nonfood packing instructions – available here: <https://sallinggroup.com/en/contact/suppliers>.

4.1 REGULAR PACKED ORDER

In a regular packed order each colour and size must be packed separately, and each size must have its own article no. and EAN barcode. This type of packaging can also be referred to as SKU or supplementary order.

For the price stickers/care label/hangtag you find the information about barcode in the column “Article EAN”, and the information about varenr. /article number in the column “Article no”.

EAN for carton you find in the column “Carton EAN” Note that each size has a separate carton EAN which must be put on the carton.

For article 461179001 size Small, 2 pcs should be packed separately in polybag or in card box carton and 200 of these packages must be made.

For article 461179004 size XL, 2 pcs should be packed separately in polybag or in card box carton and 595 of these packages must be made.

Color Combination	Article no	Article EAN	Carton EAN	S	M	L	XL	2XL										Pcs	Crt	Total
Ascut Black	461179001	5712871204702	5712871204719	2														2	200	400
Ascut Black	461179002	5712871204726	5712871204733		2													2	450	900
Ascut Black	461179003	5712871204740	5712871204757			2												2	565	1130
Ascut Black	461179004	5712871204764	5712871204771				2											2	595	1190

4.2 MIX DISPLAY – MIX ASSORTMENT

Mix display is used for ordering mix cartons with an assortment of different articles. In a mix assortment the article number is xxxxxx900, xxxxxx901, xxxxxx902 etc. (see examples below).

Usually each colour must be packed separately across a size range, and each size must have its own article number and EAN barcode (see example for article 512416900 below).

The barcode for price stickers/care label/hangtag on the individual articles can be found in the column “Article EAN.”

For mix assortments the EAN codes in column “Carton EAN” (marked with a red cross) should not be used.

The carton must be marked with the mix assortment number (In this case 512416900) and EAN 5712871389362, highlighted with yellow – for further instruction on shipping carton marking please see Nonfood packing instructions – available here: <https://sallinggroup.com/en/contact/suppliers>.

In the example below the mix assortment has the number 900 and contains article 512416001, 512416002, 512416003, 512416004, 512416005, 512416006, 512416007 and 512416008 which are packed in a box with the indicated pieces in each size and a total of 14 pieces in each of the 120 cartons ordered.

Color Combination	Article no	Article EAN	Carton EAN	98	104	110	116	122	128	134	140							Pcs	Crt	Total
ascut Blue Denim	512416001	5712871389119	5712871389126	1														1	0	0
ascut Blue Denim	512416002	5712871389133	5712871389140		1													1	0	0
ascut Blue Denim	512416003	5712871389157	5712871389164			2												2	0	0
ascut Blue Denim	512416004	5712871389171	5712871389178				2											2	0	0
ascut Blue Denim	512416005	5712871389195	5712871389202					3										3	0	0
ascut Blue Denim	512416006	5712871389218	5712871389225						3									3	0	0
ascut Blue Denim	512416007	5712871389232	5712871389249							1								1	0	0
ascut Blue Denim	512416008	5712871389256	5712871389263								1							1	0	0
	512416900		5712871389362															14	120	1680

In the example below, you can see that each color gets their own Mix article no and carton EAN - 908588900 for color 17-0613 TCX Vetiver and 908588901 for color As cut Black. On the right side of the assortment chart "Pcs" indicate total number of garments in each of the "Crt" cartons ordered.

Color Combination	Article no	Article EAN	Carton EAN	S	M	L	XL	2XL									Pcs	Crt	Total
17-0613 TCX Vetiver AOP	908588006	5712876568342	5712876568359	1													1	0	0
17-0613 TCX Vetiver AOP	908588007	5712876568366		2													2	0	0
17-0613 TCX Vetiver AOP	908588008	5712876568380		2													2	0	0

4.3 LOGISTICAL DISPLAY

Logistical display is used when an article needs to be ordered in more than one unit of measure (UoM).

In a logistical display the number is often xxxxxx500, xxxxxx501, xxxxxx502 etc. (see example for article 891109507, 891109508 and 891109509)

EAN for price stickers/care label/hangtag you find in the column “Article EAN.”

The carton must be marked with the logistical display number specific for the color and size (e.g. 891109507) and the respective carton EAN 5712875156014 – see blue highlight.

In the example below the logistical display with the number 891109507 contains 2 pcs. of garment 891109008 size 5XL, and the ordered quantity is 36 cartons, equaling a total of 72 garments. The logistical display with the number 891109509 contains 2 Pcs of garment 891109010 size 7XL, and the ordered quantity is 32 cartons, equaling a total of 64 garments.

Color Combination	Article no	Article EAN	Carton EAN	3XL	4XL	5XL	6XL	7XL											Pcs	Crt	Total

	891109509		5712875156038																2	32	64

4.4 FAKE MIX

In a fake mix you must pack all sizes in the same colour in one box.

All articles must have the same article number and the same EAN code.

EAN for price stickers/care label/hangtag you find in the column “Article EAN”.

EAN for carton you find in the column “Carton EAN”.

Color Combination	Article no	Article EAN	Carton EAN	28	29	30	31	32	33	34	35								Pcs	Crt	Total

5 MASTERDATA - DATA FROM SUPPLIER

The Salling Group central warehouse operates with a high level of automation. Based on the measurements provided by supplier in the Masterdata Sheet, articles are assigned to different flow types; Small, Medium and Large. In the packaging instructions (found via <https://sallinggroup.com/en/contact/suppliers>) you can find the measurement that apply for each flow type. It is crucial to Salling Group operations that the measurements registered are accurate and match the actual delivered cartons.

Regarding the process of item number registration and order registration please follow these guidelines. For each order the supplier must fill in a Masterdata Sheet. Kindly find the sheet via this link https://www.dropbox.com/s/t6yelt9o2wv3ogm/DFS_ENG_TEX.xlsm?dl=1

It is very important that the Masterdata Sheet containing crucial information about dimensions is forwarded to Salling Group at the same time as the order confirmation.

- a. Please forward the order confirmation to Goodsflow as usual via the e-mail address vareflow@sallinggroup.com
- b. Please forward the dimensions to Masterdata via the e-mail address masterdata.textil@sallinggroup.com

Always remember to state the specific Purchase Order number (PO) and department/group number in the subject line when sending above mails.

Guidance to the Masterdata sheet

1. Fill out the field *shipping unit* with dimensions for the shipping carton.
2. If you have inner carton to be packed in a master carton/outer carton you must fill in the dimensions for the inner carton in the field called *shipping unit* and the dimensions for the master carton/outer carton in the field called *receiving unit*.
 - E.g. 3 T-shirts in a polybag in an inner carton and 4 of those in a master carton/outer carton = totally 12 pcs.
3. Under receiving unit you should write the number of inner cartons and under shipping unit you write pcs. per carton/pcs. in inner carton.
4. You can always use the *Guide* in the Masterdata sheet if you need further explanation or press the *question marks* for a simple explanation.

The image shows a screenshot of the Masterdata Sheet form with several red annotations and arrows pointing to specific fields:

- Attention:** A red arrow points to the 'Number of inner cartons/polybags' field in the 'Receiving Unit' section, with the text: "Attention: If the number of inner cartons/polybags is greater than 1 you must fill out receiving and shipping unit. If not, only fill out the shipping unit."
- Number of Innercolli inside carton:** A red box highlights the 'Number of inner cartons/polybags' field.
- Dimensions for Outer Carton:** A red box highlights the 'Depth - largest dimension', 'Width - 2. smallest dimension', and 'Height - smallest dimension' fields in the 'Receiving Unit' section.
- Number of pcs inside Innercolli/polybag:** A red box highlights the 'Pcs per 1 colli/polybag' field in the 'Shipping Unit' section.
- Dimensions of innercolli/polybag:** A red box highlights the 'Depth - largest dimension', 'Width - 2. smallest dimension', and 'Height - smallest dimension' fields in the 'Shipping Unit' section.

The form includes fields for Vendor name, Vendor number, Purchasing group, Order number, To: (DS Textil, Aarslev), Dansk Supermarked Article number, Receiving Unit (Outer Carton) details, Shipping Unit (Inner carton/polybag) details, and a section for 'To be filled by Masterdata' (LY1, PA1, LEX, PEK, Size of inner carton).

6 REQUIREMENTS

6.1 QUALITY SPECIFICATIONS

Garments must follow quality specifications with test methods and requirements from Salling Group attached as PDF on the order sheet.

6.2 MEASURES

Tolerance for measurements:

In general, +/- 1 cm on measurements graded by 1,5 cm or more; +/- 0,5 cm on measurements graded by 0,5-1,5 cm; in all max ½ size.

6.3 MANUFACTURING AND WORKMANSHIP

Sewing thread must be polyester (or polyester/cotton), size 30 for jeans and size 100 for other garments. Common stitches 15-18 stitches/30 mm, 5 stitches/20 mm for jeans. Same quality of tread in all seams. Colour will be defined in the PDF order sheet. Tread must meet the same requirements to colour fastness to washing as the fabric.

Deco stitches: 1-needle or 2-needle lockstitches, 7-8 stitches/20 mm. Corrections are not allowed on deco stitches.

The machine chosen must be suitable for the specific product. 1-needle lock stitches, 1-needle over edge stitches and safety lock stitches, 2-needle over lock stitches: 8-9 stitches/20 mm. 3- and 4-needle over lock stitches, 3- and 4-needle over lock stitches combined with safety lock stitches, 2-needle flat seam stitches, 2-needle lock stitch : 7-8 stitches/20 mm. 4- and 5-tread feed of the arm: 6-7 stitches/20 mm. 2-, 3- and 4-needle interlock stitch machine: 10-12 stitches/20mm. 2-needle chain stitch machine: 9 stitches/20 mm.

Jeans: Inseam, back rise, front rise and saddleback must be sewn with fell seam (jeans seam). Front and back rise sewn first, inseam second. Side seam in 5-needle chain stitch. Buttonhole sewn w. eye buttonhole machine. Waist stitching sewn w. 1-needle chain stitch. Hemline sewn w. lockstitch. Button at waist always placed in line w. zipper. Pocket lining made in cotton sheeting.

T-shirt, sweats, fine knitting and the like: All inside seams must be sewn w. 4-needle over lock. All 2 needle and flat lock seams must overlap 2 cm at start/end to avoid unravelling. Logo-label must be attached with ground colour tread. Shoulder seam inside must be sewn with silicone tape for stable trivializing.

6.4 ACCESSORIES

- All accessories must be attached according to Safety in children's wear (find here: <https://sallinggroup.com/en/contact/suppliers>)
- For **padding or shoulder pads**, the padding must be bonded to prevent fibre migration.
- **Elastic** band + elastic insert must retain the elasticity for the lifetime of the product itself.
- **Piping, lace and other trimmings made of fabric** must meet the same requirements to dimensional stability and to colour fastness as the garment itself.
- **Prints** must be permanently fixed. Dyestuff and fixation processes must be chosen to secure that the print meets the same requirements to colour fastness to washing as set up for the garment in general. Must not contain PVC and phthalates.
- **Interlining** must be fused using correct temperature, time and pressure. The material must remain smooth after fusing.
- **Bra:** channels for wires under breast cups must be closed and tacked with bar. Hook and eye closure must be tacked to double layer of fabric.
- **Technical outerwear or rainwear:** For taped seams we require the tape must be welded on a correct pressure, time and temperature. The tape must remain securely welded after several cleaning treatments. Folds on the outer fabric under the tape are not permitted. Wrinkles on the waterproof tape are not permitted. Bottom hem must not form wrinkles.
- For women's wear a horizontal **hanger loop**, in 0,4 cm sateen band tone-in-tone with main fabric ground color, must be included in the price for all tops (except roll neck, turtleneck and shirts). Must be attached at shoulder seams and go around hanger. Length must be adjusted to garment and hanger. Please note that you should attach only ONE loop per item.

6.5 FINISH

- All **seams and stitches** must run evenly. All seams must be properly attached. Buttonhole tread must be intact in both sides and buttonholes must be properly trimmed. The tread tension on the sewing machines must be correct adjusted to avoid slack or tight stitches/seams. The fabric fibres must not be damaged by the use of damaged or coarse needles. All goods must be properly trimmed. Loose tread ends are not acceptable. Seams must not break when garment is e.g., pulled over the head.
- The garment must be free of dirt, unnatural smells, flaws and stains.
- The garment must be free of pressure marks and glazing.

- The garment must not have any chemicals/enzymes leftovers after washing/finish.
- If extra button for a product is required, this will be mentioned in the PDF order sheet. An extra button must be sewn into the care label.

6.6 SAMPLES - GENERALLY

When sending samples make sure to use as little packaging materials, plastic and polybags as possible. For all orders we need the samples for approval stated under "Deadlines" on the PDF order sheet.

Deadlines	
Description	Date
Lap dip: all colours	13/03/2017
Print	20/03/2017
Photo: 1 pcs in size 152 or 146/152 in all colours	04/04/2017
PPS: 1 pcs in size 140 or 134/140 in all colours	05/05/2017
Shipment samples: One of each colour from bulk production w/labels in size 152 or 146/152	19/05/2017
Accessories	29/12/2099
Size set size 134+158+170 or 134/140+146/152 +170	29/12/2099

All sample deadlines (ETA) stated in the order must be kept. The size range and quantity of samples required must be followed carefully. Failure to comply may result in claim for rebooking of photo shoot, claim for lost profits and cancelling orders according to our general terms in the trade agreement. Each Salling Group textile department have their own requirement for samples and sample flow. Please contact the relevant buying department if you have questions.

Each individual sample must have sample hangtag with correct PO order number, name, date, size, which kind of sample, weight, quality etc. See below example of front and back of sample hangtag. This is important to save time in commenting. When attaching sample hangtag to the garment make sure it does not hinder fitting process. Samples are in most cases tried on an actual person.

- Please specify what is actual/available on all samples.
- Please specify on sample hangtag/mail what we have to check for: Quality, colour, design, print, finish, weight, dying of fabric.
- It is ok to use your own sample hangtags if required information is included:
 - Supplier name
 - Date
 - PO/Purchase Order number
 - Style number
 - Style name
 - Size
 - Type of sample (proto, photo, size-set, PP sample, shipment sample)

Here is an example of front and back of sample hangtag:

6.6.1 LAB DIPS, DESK LOOMS, PRINT STRIKE OFF., HANDLOOMS

For all orders we need lab-dips/strike off etc. for approval in all colours/ combinations.

We will ask for revised lab-dips/strike off etc. several times if we are not satisfied.

Lab dips will be approved under D65 (daylight), col. white also under UV light.

We will send you "Scotdic" and "As Cut" colours, you must buy your own pantone colours.

Please always write on lab dips/cuttings what we must check for: Quality, colour, design, print, finish, weight, dyeing of fabric.

6.6.2 SIZE SET

When we ask for a size set it will be described in the PDF order sheet, which specific sizes we need; 2 or 3 different sizes (not the whole range). It is particularly important that you send these specific sizes. Sample will be rejected if it is not correct requested size.

Size set can be in available colours but must be correct/actual quality, or remarkably similar to the correct quality. All workmanship must be actual. Please follow the style sketch carefully – otherwise the samples will not be approved.

If any details are unclear to you, or if you have suggestions for improved workmanship, please mail photo of details for approval before sending size set samples or photo samples to save time.

6.6.3 FITTING SAMPLE

When we ask for fitting sample in deadline overview, please send 1 piece in the size according to PDF order sheet. It is particularly important that you send this specific size. Sample will be rejected if it is not correct requested size.

We will ask for revised fitting sample until we are satisfied with fitting.

The fitting sample can be in available colour and available fabric, but must be same quality/composition, or remarkably similar to the correct quality. Please make it clear on the sample hangtag, what is actual/available on the sample.

All workmanship must be actual. Please follow the style sketch carefully – otherwise the samples will not be approved.

If any details are unclear to you, or if you have suggestions for improved workmanship, please mail photo of details for approval before sending size set samples or photo samples, to save time.

6.6.4 PHOTO SAMPLE

We need photo samples in sizes and quantity according to PDF order sheet.

Photo samples must be in all correct/actual colour combinations, fabric, trimming, correct hangtags and labels, workmanship and design (or remarkably close). Occasionally we need photo samples in varied sizes. We will inform you via mail or PDF order sheet.

All products sold in packaging must be delivered as such. When photographing the product, we keep it in the packaging.

It is ESPECIALLY important that you always keep deadlines for photo samples. When you accept the order, you confirm to keep all deadlines given in the PDF order sheet.

If we do not have the photo samples in time, we will charge you for extra photo shooting USD 400/ DKK 2400, or we can be compelled to cancel the order.

6.6.5 PRE-PRODUCTION SAMPLE

If we ask for Pre-Production sample (PP) you have to deliver in all colour combinations, in sizes according to PDF order sheet or mail from pattern designers.

PP samples must be in bulk fabric, final approved workmanship, with all bulk accessories such as labels, buttons zipper etc.

PP samples must be sent for approval, BEFORE/PRE starting bulk production.

6.6.6 SHIPMENT SAMPLE

We require shipment samples in all colour combinations, in sizes according to PDF order sheet or mail from pattern designers.

Shipment samples must be taken from the actual bulk production.

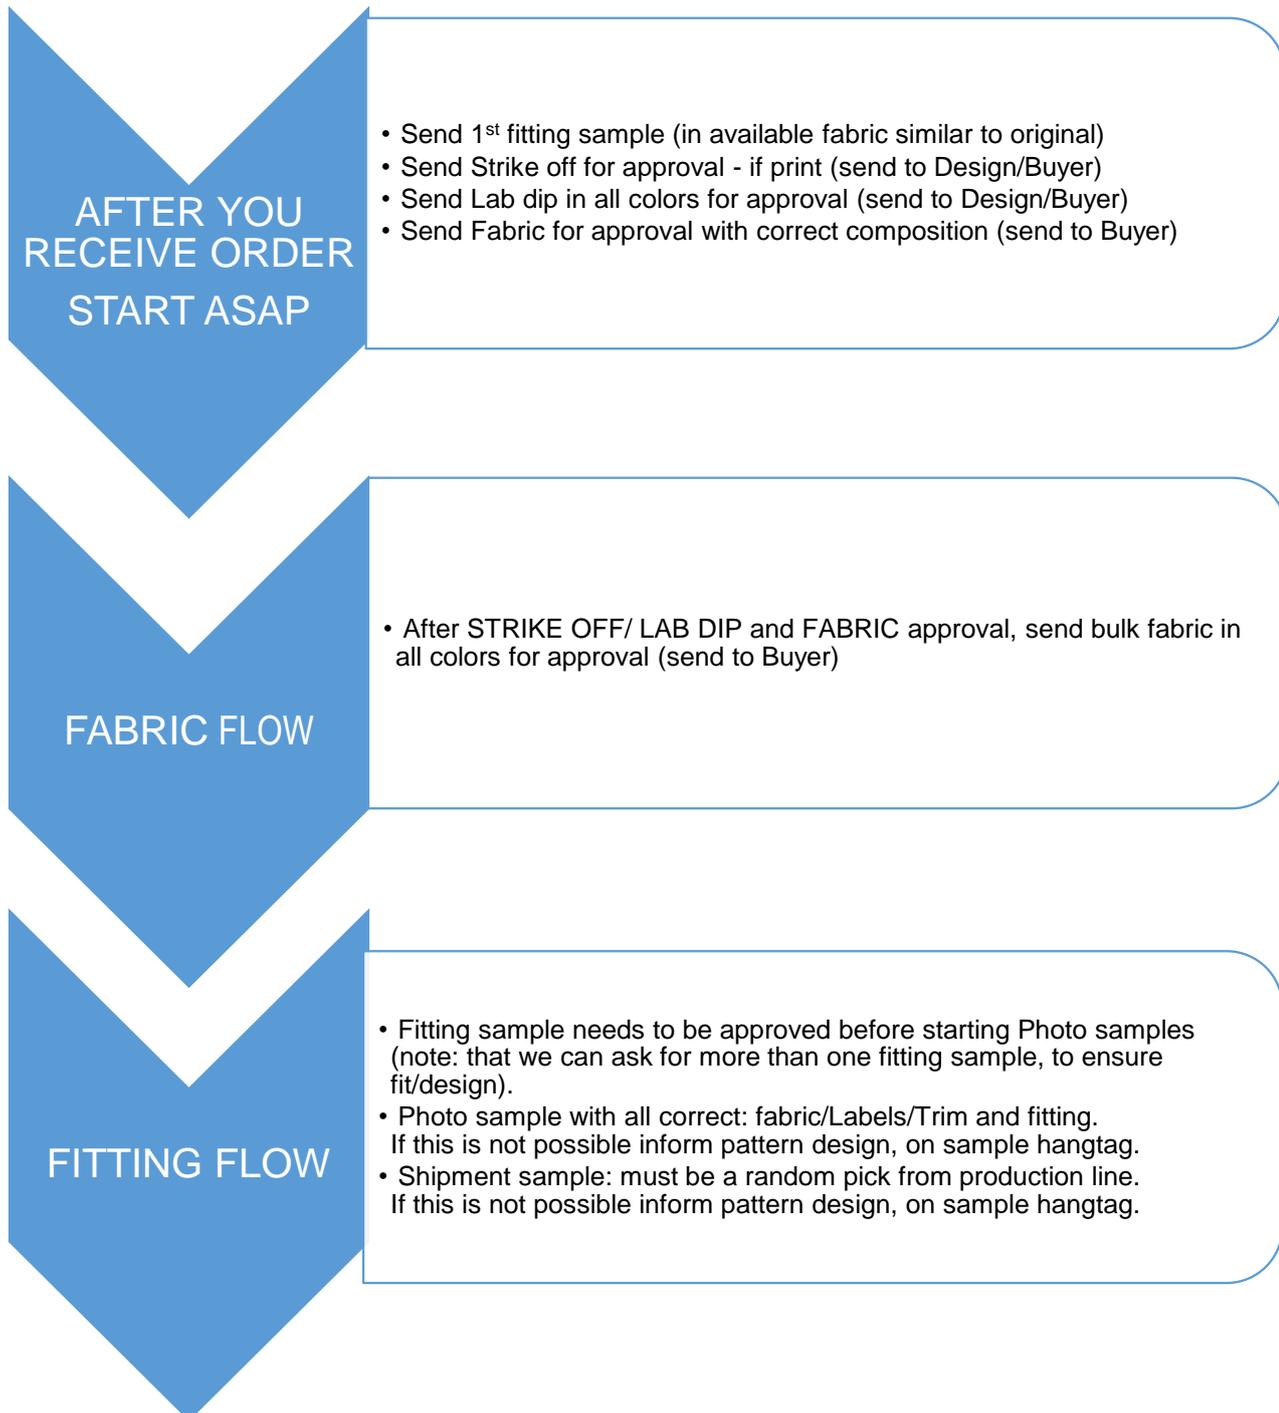

Shipment samples must be correct in every way and must be approved prior to shipment of the goods.

6.7 DELAYS

If supplier is facing a delay for any reason, please inform us AS SOON AS POSSIBLE. Show us alternative solutions, tell us the possibilities, do not ignore delays. We need the best possible garment, and we need it on time.

6.8 SAMPLE FLOW FOR WOMENS WEAR SUPPLIERS

Suppliers for Womens wear can see the sample flow, they are expected to follow here.

Deadline for sending first fitting sample is 3 weeks after order is placed and PDF order sheet with PO number is sent to supplier.

Deadline for photo samples is set 18 weeks before garments have to be sent to our Bilka stores and føtex stores.

The period between those two deadlines is usually 2-3 months – supplier must use this time optimally to ensure fitting approval from pattern designers.

ETD is usually 5 weeks after photo sample deadline, so measurement and fitting have to be completely settled in time before making photo samples – there is not time for revised samples after photo sample deadline.

7 VRS LABEL MANUAL

All information regarding labels and hangtags on the garment can be found in the PDF order sheet for the specific garment with reference to our VRS Label Manual.

Link and password to VRS Label Manual are also in the PDF order sheet.

If there are any issues in this regard, please contact the relevant buying department.

8 CARE LABEL

8.1 GENERAL POLICY

By law all text on care labels must be written in Danish. Care label must always inform costumer how to maintain functionality the longest.

In the PDF order sheet it will be defined, which care label to use and the information that should be on the label. Quality and layout of care label can be found in the VRS Label Manual. Link and password to VRS Label Manual are in the PDF order sheet.

Directions from order sheet and VRS Label Manual must be followed.

Labels must be made of suitable material capable to withstand several washings corresponding to the lifetime of the product.

Labels must be fastened securely and be legible both in relation to text and symbols during the useful life of the product.

Labels must be fastened so they can be seen, or easily found by consumers at the point of purchase.

If you have any questions, please reach out to the relevant buying department.

8.2 SYMBOLS

In the order sheet buying department will specify the wash and care symbols, we find appropriate for the specific style. Supplier is expected to check and question buying department if the wash and care instructions in order sheet are not appropriate for the specific quality/fabric.

Printed symbols must be min. 5 mm tall and printed text min. 2 mm tall.

None of the symbols or the text on the label are allowed to be covered up.

Salling Group use the ISO 3758 symbols on care labels.

8.3 FIBRE CONTENT / COMPOSITION

Salling Group Textile department require compliance with the Regulation (EU) No 1007 of the European Parliament and of the Council (via link [EUR-Lex - 32011R1007 - EN - EUR-Lex \(europa.eu\)](#) in regards to textile fiber names and related labelling and marking of the fiber composition of textile products.

At order giving point supplier and Salling Group buying department have agreed on a fiber composition. If, for any reason, supplier need to deviate from this composition, supplier must immediately contact buying department to find a solution or compromise. The composition stated on the care label must be the same as the actual bulk production.

The composition must always be in Danish, the language of the country in which the product is sold. Please see below translations for common fibers used.

The actual generic fiber content must be stated in care label. Highest percentage must be stated first, and so forth e.g., 90% bomuld, 10% polyester. It is the supplier's responsibility that fiber content is correct.

According to Regulation (EU) No 1007, generic fiber content must be declared as precisely as possible and must not deviate more than 2% from the declared.

If a garment consists of several textile materials or if the material has embroidery, this must be specified in the care label. Section 40A in **the label manual** describes how to define this.

Please note, it is the supplier's responsibility that instructions on care label are correct. If supplier has any questions, relevant buying department should be contacted. More information can be found in **the label manual**.

English	Danish	English	Danish
Acrylic (Polyacrylic)	Polyacryl	Nylon	Nylon
Cotton	Bomuld	Paper	Papir
Elastane*	Elasthan*	Polyamide	Polyamid
Elastomultiester	Elastomultiester	Polyester	Polyester
Leather	Læder	Polyurethane	Polyurethan
Linen	Hør	Rubber	Gummi
Lyocell	Lyocell	Silk	Silke
Metallic fibres	Metallisk fiber	Suede	Ruskind
Modal	Modal	Viscose**	Viskose**
Modacrylic	Modacryl	Wool	Uld

*Spandex is the North American word for Elastane, this term must not be used in Europe.

**Rayon is the North American word for Viscose, this term must not be used in Europe.

Please note; fibres marked with ® are registered trademarked and fibres marked with ™ are considered as trademarked. These terms can only be used in agreement with trademark owner. Examples of these types of fibres:

- LENZING™ ECOVERO™ viscose
- LENZING™ Tencel™ lyocell
- Lurex®
- Lycra®

8.4 COUNTRY OF ORIGIN

In care label country of origin must be stated. It must be written in Danish, and below you can find the translations of country names from English to Danish. "Produceret i" is the Danish words for "Manufactured in".

The text on the care label should be:

Produceret i _____

English	Danish	English	Danish
Albania	Albanien	Malaysia	Malaysia
Austria	Østrig	Netherlands	Holland
Bangladesh	Bangladesh	Norway	Norge
Belgium	Belgien	Pakistan	Pakistan
Bosnia	Bosnien	Portugal	Portugal
Bulgaria	Bulgarien	Romania	Rumænien
China	Kina	Singapore	Singapore
Denmark	Danmark	Slovenia	Slovenien
France	Frankrig	Spain	Spanien
Germany	Tyskland	Sweden	Sverige
Hong Kong	Hong Kong	Taiwan	Taiwan
Hungary	Ungarn	Tunisia	Tunesien
India	Indien	Türkiye	Tyrkiet
Indonesia	Indonesien	Ukraine	Ukraine
Italy	Italien	United Kingdom	Storbritannien
Macedonia	Makedonien		

8.5 PLACEMENT IN GARMENT

Care label must be placed directly on the product or on a sewn in label. If this is not applicable/possible, the information can be printed on the packaging. Please follow the information on the PDF order sheet.

For all upper parts and short skirts/shorts (above the knee) care label must be placed in left side seam 10 cm up from bottom hem.

For all long skirts/shorts (below the knee) care label must be placed in left side seam 20 cm up from bottom hem.

For all pants care label must be placed at left side seam. If no side seam, then place in waistband on the left side.

8.6 CONSEQUENCES FOR NON-COMPLIANCE

We do not accept care labels with wrong information in our stores.

If our instructions for lay-out, symbols and text have not been followed, it is suppliers' responsibility to change care labels before shipment.

If production has been shipped out, we can provide contact to Danish production place, to change care labels and forward all the costs to supplier.

9 SECURITY TAGS / ALARMS

9.1 WHEN TO ATTACH ALARMS – RETAIL PRICE LIMITS

Please notice that if security tags/alarms are required it will be mentioned in the PDF order sheet.

DEPARTMENT	PRODUCT TYPE	RETAIL PRICE
Womens Wear	All Clothing	≥249 DKK
Childrens Wear	All Clothing incl. Outdoor Wear	≥249 DKK
	Branded products	≥149 DKK
Men's Wear incl. Men's Night Wear	All Clothing	≥299 DDK
	Branded products	≥179 DKK
Sports Wear	All Private Label	≥299 DKK
	Branded products	≥179 DKK
Shoes	All Private Label Shoes	≥349 DKK
	Branded products	≥249 DKK
Underwear	Night Wear	≥199 DKK
	Lingerie	≥79 DKK
	Branded products	≥99 DKK
Accessories	Choice by Heart	≥99 DKK
	Branded products	≥99 DKK

9.2 PLACEMENT OF ALARM ON ALL PRODUCTS

No alarms for fine woven silk or cotton, where the heavy alarm might cause holes.

The alarms should be placed on the left-hand side of the garment. By mounting of alarm tags, kindly make sure that the alarm tag is attached in a seam, to avoid damaging the fabric.

If taped seams, please place alarm in the zipper puller. If no zipper, please place alarm in the pocket bag.

If supplier does not follow our procedures for security tags, supplier will be charged. The cost will be 450 DKK an hour for the time spent by us mounting the alarms.

9.3 HARD ALARM

Please notice that if security tags are required it will be mentioned in the PDF order sheet. The security tag must be included in the cost price (also the customs duties).

It is extremely important that only hard alarms from Sensor Matic are used, otherwise we will experience trouble getting the alarm detached in our stores. Any costs associated with using other hard alarms than Sensor Matic will be forwarded to supplier.

Please see pictures of the alarm below, which consists of two parts (the pin and the actual devise). This type of alarm is to be applied for our products, unless otherwise is requested by Salling Group, Textile Department.

9.3.1 HARD ALARMS FOR FOREIGN SUPPLIERS

Please be aware that if the supplier has not used hard alarms for Salling Group Textile products previously, you must contact Salling Group buying department for guide to register to be able to order hard alarms.

Once registered supplier can use following link; https://sourcetags.sensormatic.com/ccrz_CCSiteLogin

The handling of alarms is provided by Tyco Fire, Security & Services Pte Ltd., under Johnson Controls. Supplier must contact their local department of Tyco Fire, Security & Services Pte Ltd.

9.3.2 HARD ALARMS FOR DANISH SUPPLIERS

Danish suppliers with a Danish delivery address can order alarms via the following link:

https://sourcetags.sensormatic.com/ccrz_CCSiteLogin

(Only to be used after confirmation from your contact person at Salling Group, textile department).

Please order the below tags and pins:

AM Gray Tack for SuperTag - Box of 100
SKU: MJ200-G

Non-Deactivatable SuperTag VST-R
SKU: ZLAMT7100R-G

The Alarm Tags will be delivered from Denmark. Leadtime of delivery is approximately 1 week.

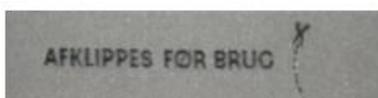

9.4 SOFT ALARM

For some products in accessories, underwear, women's and men's wear, we request a soft alarm. Whether a product needs alarm or not depends on the retail price – see chart on previous page. Please contact relevant buying department for ordering of soft alarm. See picture of soft alarm below:

Furthermore, supplier must order the bags for the alarm via this link: <http://www.labels-tags.biz/neworder/>

Please find the correct password divided into departments on the PDF order sheet. Please see picture below for picture of alarm bag:

9.5 FOR BRANDED SPORTS PRODUCTS ONLY

Below supplier can find extra guide for sports products to be followed.

9.5.1 ALARM PLACEMENT

Place the alarm as illustrated below:

9.5.2 STRIP SHOES TOGETHER

Strip shoes together as shown on photo below:

9.5.3 PRICE STICKER

Place price sticker as shown on photo below. Avoid covering the barcode.

10 TEXTILE CHEMICAL RESTRICTIONS POLICY

Suppliers must at all times follow and keep updated on Danish and European legislation and the products and packaging must at all times comply with any and all applicable laws and regulations as well as requirements and specifications agreed by Salling Group and Suppliers.

Example of relevant regulations (please note that the list is not exhaustive).

Regulation	Description
REACH (EC) No 1907/2006	<p><u>REACH</u> is a regulation of the European Union, adopted to improve the protection of human health and the environment from the risks that can be posed by chemicals, while enhancing the competitiveness of the EU chemical industry.</p> <p>REACH sets up restriction on the usage of chemical substances and the content of chemical substances in articles – including textiles, accessories and shoes. The restriction of chemical substances for various products and materials are described in the Restriction List in appendix XVII.</p> <p>REACH is also the basis for the Candidate List. The Candidate List encompass Substances of Very High Concern (SVHC) with effects like carcinogenic, mutagenic, toxic for reproduction, persistent, bio accumulative etc.</p> <p>Please note that the Candidate List is updated twice a year and suppliers should always keep updated on the current version of the Candidate List.</p>
Persistent Organic Pollutants (EU) No 2019/1021	The objective of this regulation is to protect human health and the environment by prohibiting or restricting chemical substances subject to the Stockholm Convention on Persistent Organic Pollutants.
Biocidal products (EU) No 582/2012 Including treated articles	The regulation concerns the placing on the market and the use of Biocidal products, which are used to protect humans, animals, materials or articles against harmful organisms like pests or bacteria by the action of the active substances contained in the Biocidal product.

Below You can see an overview of some of Salling Group, Textile Department requirements which you are also required to comply with.

Restriction	Salling Group Requirement
Quality Specifications (physical requirements)	All products must comply with Salling Group, Textile Department quality specifications attached to the individual PDF order sheet. Please contact the Quality Department in order to get a copy or if you have any further questions. kvalitetsafd_nf@sallinggroup.com
RSL - Restricted Substances List	Salling Group, Textile Department's Restricted Substances List (RSL) must be followed. This list includes restricted or banned chemical substances. In order to access the RSL please contact the Quality Department, kvalitetsafd_nf@sallinggroup.com
Polyvinylchloride (PVC)	Usage ban. Applied to any products including, but not limited to plastic trimmings, plastic print, plastic zippers, plastic soles, plastic covers, bags, wrapping related to packing and shipping.

Per- & polyfluorinated substances (PFC's)	Usage ban Applied to any products, Including packing and shipping.
Nickel release (EN 1811)	Nickel release limit restrictions apply to all products, hangers and alarms.
Phthalates	Danish restriction regarding all phthalates in articles for small children in the age group 0-3 years must be followed (Statutory Order no. 786 of 11 July 2006).
Sandblasting	Usage ban Sandblasting as a production method is not allowed.
Regulations applicable to Baby and Kids wear, footwear, accessories	Supplier must comply with the current applicable version of the following standards: Toys standards EN 71-1, EN 71-2, EN 71-3, EN 71-10, EN 71-11 and EN 71-12; CEN/TR 16792 and EN 14682. Supplier must also follow Salling Group, Textile Department's restrictions for Safety in Children's wear – via link https://sallinggroup.com/en/contact/suppliers .
Gas in containers	<p>To avoid harmful gas in the containers, the Suppliers must follow Salling Group's</p> <ul style="list-style-type: none"> • Trading Agreement • Packing Instructions • Restricted Substances List. Please contact Salling Group for receiving the restricted substances list. <p>Restricted substances list includes restrictions for:</p> <ul style="list-style-type: none"> • Toluene (CAS no. 108-88-3) • Benzene (CAS no. 71-43-2) • Formaldehyde (CAS no. 50-00-0) <p>The use of chemical substances in production and packaging should be avoided when possible.</p> <p>If you use chemical substances in your production:</p> <ul style="list-style-type: none"> • Products containing chemical substances will evaporate after production, and some contamination can be avoided by not packing the goods immediately after production. • To avoid or minimize contamination in the packing, certain products should be delivered in perforated packing. This is especially important for suppliers of shoes and other products containing many chemical substances. <p>Avoid unnecessary use of fumigates in the container.</p>

11 SUBSTANCES OF VERY HIGH CONCERN - SVHC

It is the supplier's obligation and responsibility always to inform Salling Group regarding SVHC. Please note that the packaging is regarded as a separate article, and information to Salling Group about SVHC is also needed.

Salling Group ban > 0.1 % of any SVHC on the [Candidate List](#) in all private label products including all VRS products.

Please note that the Candidate List is updated twice a year and supplier should always keep updated on the current version of the [Candidate List](#).

12 MATERIAL POLICIES

12.1 REQUIREMENTS FOR FEATHERS AND DOWN

Vendors must label feathers and down as specified in EN 12934.

Furthermore, vendors of products with feathers or down, must provide one of the following certificates per order:

- DOWNPASS: <https://www.downpass.com>
- Responsible Down Standard certificate: <http://responsibledown.org>

The certificate must be E-mailed to the Salling Group Buying Department.

The E-mail header must contain all Salling Group's order numbers for which the certificate is valid. The documents must be received by the buying department before products are dispatched to Salling Group.

12.2 REQUIREMENTS FOR LEATHER

MATERIAL	BASIS	DESCRIPTION
Social program/standard for all leather products or leather parts	Salling Group requirement BSCI Sedex: SMETA SAI, SA8000 ICS	For existing vendors: The tannery applied must be able to provide documentation on a social standard (BSCI, SMETA, SA8000, ICS) by June 2020. For new vendors: The tannery applied must be able to provide documentation on a valid social standard upfront.
Environmental program/standard for all leather products or leather parts	Salling Group requirement LWG BEPI	For existing vendors: The tannery applied must be able to provide documentation on an environmental standard (LWG, amfori BEPI) by end 2020. For new vendors: The tannery applied must be able to provide documentation on a valid environmental standard upfront.
Recycled leather	Salling Group requirement	Full chain of custody. The vendor must be able to document the origin of the leather (tannery level), and provide the required documentation as specified above (both social and environmental program/standard).

13 CE-MARKED CATEGORIES (UV-PROTECTION, TOY CHARACTER OR PRODUCTS WITH ELECTRIC FEATURES)

For product types with special features e.g. light, sound or UV protection it is required, that a conformity assessment is conducted on the product to ensure it meets EU safety, health, and environmental protection requirements. The CE marking is required for goods sold in the European Economic Area (EEA). The rules and directives to follow in this regard are issued by the European Union.

For product types with UV protection claiming sun protection, compliance with BS EN 13758 is required. UV Protective clothing is considered as Category 1 Personal Protective Equipment (PPE) under the scope of the EU Regulation for Personal Protective Equipment 2016/425.

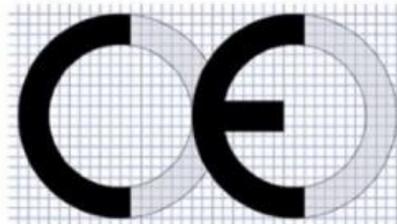

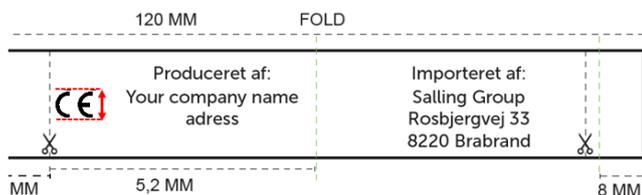

For product types which can be associated with a specific (toy) character, CE marking is required and must meet EU safety, health, and environmental protection requirements for toys, since it will be of play character and used as a toy even though it is a garment. In addition to CE marking technical documentation with a chemical risk assessment (chemical composition of the materials, all dyes and any treatments used on the various parts of the product) and tested according to standard EN 71-1, EN 71-2, EN 71-3 is required.

If the product is of generic character e.g. a dog suit but not a specific dog character “the product is not a toy” needs to be applied in Danish to the care label or attached as a separate label.

For product types with electrical features with light, sound or alike documentation and tests for the electrical components is required. We need to have RoHS, EMC and DoC and if the product contains a battery a battery test is required. On the product the WEEE trash bin icon needs to be displayed together with the legal electronic waste text.

It is the manufacturer's responsibility to carry out the conformity assessment, set up the technical file, issue the EU declaration of conformity, and affix the CE marking to a product (**CE**) of at least 0,5cm high. Only then can this product be traded on the European market.

For Private label styles, the documentation and test reports must be sent to the Quality Department kvalitetsafd_nf@sallinggroup.com

For branded styles it is the supplier's responsibility to keep the documentation and Quality Department makes random check to secure due diligence throughout the supply chain.

It is supplier's responsibility that CE marking, affixing and documentation is compliant.

If supplier has any questions or in need of guidance in regard to CE marking, they can be directed to kvalitetsafd_nf@sallinggroup.com.

14 MATERIAL CLAIMS

14.1 GENERAL POLICY

Any claim made on a product sold in Salling Group stores must be validly documented. This is legally required by Danish Legislation, and The Danish Consumer Ombudsman can issue fines if a company is found to not have sufficient documentation for their claims, or if they are found to mislead consumers.

When negotiating an order with buying department, and agreeing on composition and/or material claims, supplier is subsequently responsible for ensuring that the end product is in compliance with this agreement. This policy applies if a style needs a special fiber claim of properties, e.g.:

- Organic
- GOTS - Global Organic Textile Standard
- Recycled
- OEKO-TEX
- Declarations/assertions e.g., waterproof, water repellent, breathable - according to TECH TEST PROCEDURE.
- Bionic Finish Eco
- 3M reflex
- Special requirements e.g., down certificates according to ANIMAL WELFARE POLICY

When the buying department places an order, supplier will be able to see Salling Group deadlines for sending certificates in the PDF order sheet. These deadlines are set with careful consideration to our business flow and have to be kept. If supplier becomes aware of an issue that may cause a delay or any issues with compliance of documentation of claims, the buying department must be contacted immediately in order to ensure the information on the garment is correct and can be documented.

For private label styles Salling Group will require the documentation filed and stored in the Buying Group.

For A-brands it is the supplier's responsibility to keep the documentation and Quality Department makes random check to secure due diligence throughout the supply chain.

If you have any questions, please contact buying department or Salling Group Quality Department (QD) Kvalitetsafd_nf@sallinggroup.com.

14.2 ORGANIC OR RECYCLED FIBERS DOCUMENTATION AND LABELLING

For styles that claim Organic or Recycled fiber content, Salling Group will always need valid documentation.

Required documentation:

1. Scope certificate (SC)/ Certificate of Compliance (CoC) – from fiber, yarn, fabric or last processor in the supply chain.
 2. Transaction certificate (TC) – from Scope holder to the next step in supply chain.
 3. Vendor Letter (VL) – Buying department have a template for the VL document – from Salling Group supplier, stating the connection between the claimed material and the finished style.
- The buying department must always have valid documentation for each Purchase Order number (PO).
 - Scope, TC and VL documents must be sent to Buying Group in ONE e-mail, with the header of the mail must contain the Salling Group Purchase Order number(s) that the documentation refers to.
 - Documentation must be sent before final production and must be received min. 2 weeks before Estimated Time of Departure (ETD).

Salling Group will not accept final shipment until valid documentation is in-house. Payment on orders will be retained until valid documentation is in-house.

Regarding labelling of the style, the supplier must always follow the latest version of the VRS Label Manual.

14.3 GOTS FIBERS DOCUMENTATION AND LABELLING

For styles that claim GOTS (Global Organic Textile Standard), supplier is required to follow the standard, and must be certified to GOTS: <https://global-standard.org/>

Required documentation:

1. Scope certificate (SC)/ Certificate of Compliance (CoC) from supplier
 2. Transaction certificate (TC) between supplier and Salling Group with PO number of the finished article.
 3. Vendor Letter (VL) – Salling Group Buying department and Quality Department have a template for the VL document.
- The buying department must always have valid documentation for each Purchase Order number (PO).

- Scope, TC and VL documents must be sent to Buying Group in ONE e-mail, with the header of the mail must contain the Salling Group Purchase Order number(s) that the documentation refers to.
- GOTS documentation must be received within 2 weeks after shipment - TC with Salling Group as buyer, and the exact PO numbers in TCs.

Salling Group will not accept final shipment until valid documentation is in-house. Payment on orders will be retained until valid documentation is in-house.

Reading labelling of the product the supplier must always follow the latest version of VRS Label Manual.

14.4 GRS FIBERS (GLOBAL RECYCLED STANDARD)

As Salling is not certified to GRS, we are not able to use this logo for any private label textiles.

Please follow procedure for recycled fibers – see [ORGANIC OR RECYCLED FIBERS DOCUMENTATION AND LABELLING](#).

14.5 OTHER CLAIMS, LABELLING REQUIREMENTS AND DOCUMENTATION

Any other claim made on a product sold in Salling Group stores must be validly documented.

- OEKO TEX®
- BIONIC FINISH® ECO
- LENZING™ ECOVERO™
- Responsible wool
- Origin of (MERINO) wool

Supplier is responsible for providing valid documentation. The Danish Consumer Ombudsman can issue fines if a company is found to not have sufficient documentation for their claims, or if they are found to mislead consumers.

14.5.1 OEKO-TEX®

Salling Group has their own advertising certificate no. 776-12201 DTI, covering all products sold in all formats in Salling Group.

This includes:

- Products as a part of the standard assortment
- “SPOT-articles/ limited edition products
- Private label styles eg. VRS
- Branded products eg. Sloggi, Sødahl etc.

All articles that claim OEKO-TEX® sold in Salling Group (Bilka, Føtex, Netto, BR, Salling) must be certified and follow the guidelines and standards set by [OEKO-TEX®](#). In order to claim OEKO-TEX® every component of an article (fabric, threads, zipper, buttons and all other accessories), must be tested for harmful substances to obtain a valid certificate. The limit values and other criteria are updated at least once a year.

The supplier must send in one email:

1. a valid OEKO-TEX® certificate to Salling Group's Responsible Sourcing team via responsible@sallinggroup.com before first shipment
2. a list of the specific product(s) Salling Group buy under the certificate.
3. exact composition(s) according to the care label of the article(s), certified under the certificate.

The supplier is responsible for using the correct OEKO-TEX® logo on hangtag and in care labels, according to the latest version of the OEKO-TEX® labelling guide.

The supplier must insert **correct traceability information in care label** – that is; valid OEKO-TEX® certificate number, and the name of the applied testing institute.

The supplier must check that the OEKO-TEX® logo from shipment sample is in alignment with the valid certificate and adjust accordingly if needed.

It is required that the supplier continuously follow up on below:

- Supplier must continuously, check status on all OEKO-TEX® certificates and ensure that the Responsible Sourcing team is provided with the latest certificates and information regarding the certified articles.
- 2 months before the certificate will expire, it is time to apply for renewal at the OEKO-TEX® institute if the certificate is still in use. When the certificate is updated and valid the supplier must provide this to responsible@sallinggroup.com. Should the renewed certificate be delayed, the supplier must provide a processing letter, so the Responsible Sourcing team knows when to expect to have the new certificate in hand.

14.5.2 BIONIC FINISH® ECO

[BIONIC FINISH® ECO](#) is a fluorine-free water repellent textile finishing agent, developed by RUDOLF GROUP.

For all products and PO order number placed with BIONIC FINISH® ECO labelling, supplier must provide valid documentation.

This can be obtained via RUDOLF GROUP and must be sent to the buying department, before shipment.

Header of the email must contain all Salling Group PO order numbers. Logos must follow [BIONIC FINISH® ECO guideline](#).

14.5.3 LENZING™ ECOVERO™

LENZING™ ECOVERO™ is a viscose derived from certified wood and pulp. We require a product license for all LENZING™ ECOVERO™ fabric.

Documentation process and requirements:

- LENZING™ ECOVERO™ Certification
- Combined LENZING™ ECOVERO™ Product License and Swing Ticket Application
- Registration on LENZING™'s e-branding service
- Order hangtag/swing tickets
- Vendor letter – Salling Group Buying department and Quality Department have a template for the VL document.

A guide for LENZING™'s e-branding service to obtain Product License and Swing Ticket application will be provided by buying department. If you have questions to the guide, please contact: kvalitetsafd_nf@sallinggroup.com

Salling Group will not accept final shipment until valid documentation is in-house. Payment on orders will be retained until valid documentation is in-house. Supplier must send **LENZING™ Certification, LENZING™ Product License/Swing Ticket and Vendor Letter** to womenswear@sallinggroup.com 14 workdays before ETD.

Regarding labelling of the style, the supplier must always follow the latest version of the VRS Label Manual.

14.5.4 ORIGIN OF WOOL E.G. RESPONSIBLE WOOL OR MERINO WOOL

We require documentation for the origin of wool if it has a claim e.g. merino wool or responsible wool claim. A content claim (CCO) is needed to ensure the origin of the wool.

Required documentation for merino wool claim:

1. Certificate Of Content Claim (CCO) from authorized third parties.

Or

1. Test report documenting merino wool claim (ONLY available for merino wool claim).

Required documentation for responsible wool claim:

1. Certificate Of Content Claim (CCO) from authorized third parties.
2. Transaction certificate (TC) between supplier and Salling Group with PO number of the finished article.
3. Vendor Letter (VL) – Salling Group Buying department and Quality Department have a template for the VL document.

Salling Group will not accept final shipment until valid documentation is in-house. Payment on orders will be retained until valid documentation is in-house.

Regarding labelling of the style, the supplier must always follow the latest version of the VRS Label Manual.

15 TESTING

15.1 TEST BUREAU AND TEST EXPENCES

All tests should be submitted to Bureau Veritas. By choice of another test bureau supplier must seek written approval from Quality Department before further test arrangements.

Supplier can benefit from Salling Group's special price offers agreed with Bureau Veritas for both individual and package quality testing, nickel release testing, analytical testing according to Textile Department's Restricted Substances List, final inspections and for sample pick. Current price list can be requested at Quality Department.

If Supplier should experience any divergence between unit price stated in invoice and unit price informed by Salling Group, please contact Quality Department.

Supplier must take care of all testing expenses including final inspections and sample pick.

15.2 DEADLINES

Supplier must always keep deadline for returning any test report. The deadline is clearly stated in test request forwarded by Quality Department. If it is not possible to meet the deadline Supplier must inform Quality Department and Buying Group immediately.

An exceeded deadline without further agreement with Salling Group entitles Textile Department to cancel the order.

Final order must not be shipped before test report with PASS in all tested parameters on the final production have been confirmed by Quality Department or Buying Group.

A FAIL in test without further agreement with Salling Group Quality Department entitles Salling Group Textile Department to cancel the order.

15.3 TEST REPORTS

Salling Group only accepts test reports received by mail directly from test lab. This regards all test reports including, but not limited to quality testing, nickel release testing, and test according to Salling Group Restricted Substances List.

Salling Group does not accept older test reports, or test reports on similar products. A valid test report is performed on the requested production order and includes Salling Group Purchase Order number, defined season and a photo of the tested product.

15.4 SPECIFICATIONS FOR TESTING

Our quality specifications involve items such as colour fastness to washing, colour fastness to rubbing, tear resistance, abrasion resistance, dimensional change and change in appearance in washing. Test methods and requirements will clearly be stated on the individual specification sheet attached to the individual PDF order sheet and online via Envision-FTP server. You will receive web address, username and password to the online server from relevant buying department.

Please note that all specifications are updated continuously.

Kindly make sure always to follow the latest updated specification as per order sheet and/or Envision-FTP server. If any doubt, feel free to contact the Textile Quality Department - kvalitetsafd_nf@sallinggroup.com.

As per trade agreement supplier is liable for the Products in all respects and warrants that the Products are in accordance with the terms agreed by the Parties and comply with national as well as EU law, regulatory requirements, standards, regulations and/or other legal requirements applicable from time to time concerning – but not limited to – materials, production, safety, labelling, use and delivery of the Products.

Specification requirements must be a part of every order negotiation. Deviations must be discussed/agreed at order giving point and added to the PDF order sheet un "General information". Supplier is responsible for delivering products complying with our requirements. Noncompliance with the quality specifications entitles Textile Department to cancel the order.

15.5 FINAL INSPECTION, DPI & SAMPLE PICK

Textile Department runs Final Inspections, During Production Inspections and/or requires Sample Pick on random orders.

Bureau Veritas will be picking up the necessary samples at the relevant factory in case of sample pick. Supplier will be informed if this becomes relevant.

Final inspection including sample pick for Quality testing & testing according to Restricted Substances List on one order per supplier every year – requested by Quality Department.

15.6 QUALITY TEST

Salling Group requires test on 5-10% of incoming orders three times a year regarding our quality specifications. Supplier will be informed via e-mail by Quality Department which orders should be submitted to test. A detailed guideline will follow in the test request mail.

Please note – we have a growing concern from customers on our products and to secure quality for future orders we have decided to test all regular assortments every year.

Quality Department cooperates with Supplier and Buying Group to make arrangement to secure test of Regular Assortment covering colours and quality.

15.7 RESTRICTED SUBSTANCES TEST

Salling Group Textile's restricted substances consists of chemical substances that are banned, restricted or of high concern (e.g., REACH, PVC, PFC's, Chromium, SVHC etc.). The purpose of the Restricted Substances List (RSL) is to reduce the use of hazardous chemical substances in our products and packing material. Products and packing material that do not comply with the RSL are not accepted.

To receive latest updated Salling Group RSL on mail, please contact Quality Department kvalitetsafd_nf@sallinggroup.com.

Salling Group is at any time entitled to arrange analytical tests regarding RSL.

- Suppliers of kids wear, shoes, accessories and sportswear and will be tested **minimum twice a year**.
- Suppliers of adult wear (e.g., women's and men's wear) will be tested **minimum once a year**.

- If suppliers have FAIL in RSL test Salling Group reserve the right to request additional tests or cancel the order.

RSL test is based on test packages in compliance with AFIRM RSL testing matrix. The test package will be sent via mail for the orders chosen for chemical testing. Vendors are welcome at any time to inquire information about the various test packages via mail to kvalitetsafd_nf@sallinggroup.com.

Please note that nickel release test must also be performed as part of RSL test:

- all metal parts in baby/children's products.
- all metal parts with direct skin contact for adult products.

Salling Groups requirements for nickel release:

Metal component	Results ($\mu\text{g}/\text{cm}^2/\text{week}$)	EN 12472 & EN 1811	Salling Group limit
Earrings / piercings	$R \leq 0.11$	Pass	Pass
	$0.11 < R < 0.35$		Fail
	$R \leq 0.35$	Fail	
Other components	$R \leq 0.28$	Pass	Pass
	$0.28 < R < 0.88$		Fail
	$R \leq 0.88$	Fail	
Special for Spectacle Frames and Sunglasses	EN 16128		$< 0.76 \mu\text{g}/\text{cm}^2/\text{week}$ (EIS (Electrochemical Impedance Spectroscopy) test: Impedance $3.0 * 10^5 \Omega * \text{cm}^2$)

15.8 SUPPLIER TEST PROCEDURE

TECH Specifications and TECH INTERNAL PROCEDURE:

- must be a part of every order negotiation.
- must be informed/discussed with supplier at order giving point.
- deviations must be added to PDF order sheet under "General information".
- supplier is responsible for delivering products that meet our requirements.

Please note: Requirements are handed to supplier at order giving point.

If any of these requirements cannot be met for some reason, supplier & buyer must discuss this at order giving point. This gives buyer the opportunity to choose another kind of fabric or accept. If buyer accept lower requirements this must be stated under "General information" in PDF order sheet.

15.8.1 TESTING OF TECHNICAL WEAR (E.G. TREATED WITH BIONIC FINISH®)

Test request is mailed to supplier from Quality Department including info of procedure / relevant specifications / Test Request Form / Salling Group Restricted Substances List / Price lists.

Bulk fabric (2 m) is tested for physical parameters, one test in one colour per fabric quality.

Taped seams: All garments will have seams tested (straight, X and T-seams).

Quality test: 5-10% of all garments are randomly chosen for normal final garment test.

Analytical test: One final garment per season per supplier is chosen for chemical testing according to Salling Group Restricted Substances List.

Nickel release – please see page 24 [Nickel release \(EN 1811\)](#)

Salling Group asks for Final Inspections or DPI (During Production Inspection) or Sample Pick by Bureau Veritas on random orders if we find this necessary.

PASS = go ahead for production

FAIL = all failed parameters must be discussed with Buying Group

15.8.2 TESTING OF OEKO-TEX®

To secure quality assurance of OEKO-TEX® products in Salling Group we follow internal due diligence procedure.

To receive latest updated Salling Group OEKO-TEX procedure please ask Quality Department.

15.9 EXCEPTIONS

Products labelled with “Blomsten” or “Svanen” are generally not tested. Regarding these labels Salling Group always requires valid documentation.

A-Brands are generally not tested.

For semi-brands we require written test set-up agreed between buyer and supplier and approved by Salling Group; Textile Department; Quality Responsible person.

Licensed products are tested as any other Private Label textile product.

By signing the Trading Agreement of Salling Group, all suppliers comply to meet the order specific quality requirements.

16 HANGER REQUIREMENTS

16.1 GENERAL HANGER REQUIREMENTS

If hanger is required, it will be noted in the PDF order sheet.

Hangers must be included in the cost price, and supplier has to source the hangers locally.

Front and back of hanger should be identical.

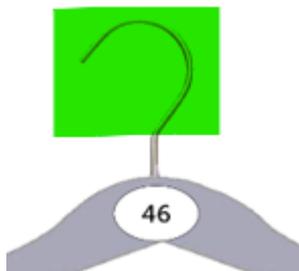

Hangers must be sturdy and be able to withstand handling and transportation. Hangers should have rounded edges.

Hangers are to be:

- grey (**Cool Grey 8C**) for common textile products
- transparent for lingerie
- black for shoes & accessories.

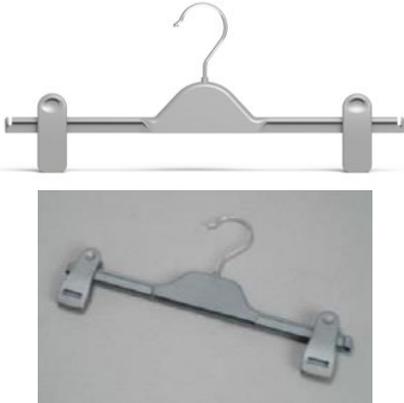

All metal hooks must be able to rotate.

At packaging stage make sure hooks are always facing to the left-hand side - for easier and faster hanging on clothes racks in stores. See below picture.

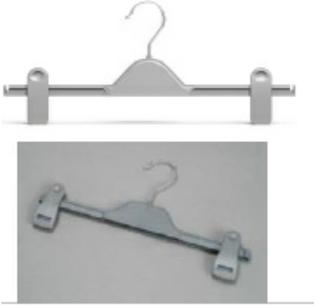

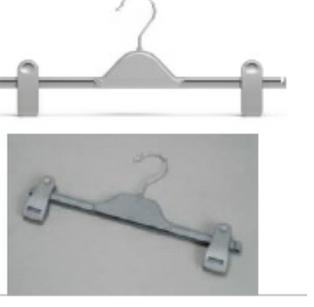

Kindly be aware that the Textile chemical restrictions policy, also applies for hangers and the metal hook, see [TEXTILE CHEMICAL RESTRICTION POLICY](#) and [SVHC - SUBSTANCES OF VERY HIGH CONCERN](#).

16.2 HANGERS FOR MEN, WOMEN, SPORT

<p>OUTERWEAR: MEN, WOMEN, SPORT. JACKIE TOP: (SIZES 48-54).</p> <p>Length 46cm, Width 13mm. Hanger should be identical to picture.</p>	
<p>TOP: MEN, WOMEN (SIZE 36-46)</p> <p>Length 41cm, Width 10mm. Hanger should be identical to picture. With non-slip and retention hook.</p>	
<p>SET TOP/TROUSER</p> <p>Length 45cm, width 14mm Hanger should be identical to picture.</p>	
<p>SET TOP/TROUSER WITH NON-REMOVABLE BAR</p> <p>Length 44cm, width 7mm Hanger should be identical to picture.</p>	
<p>PANTS/SKIRTS/SHORTS: WOMAN PANTS/SHORTS: MEN</p> <p>Length 36cm, Width 23mm Hanger should be identical to picture. Adjustable soft rubber padded clips.</p>	

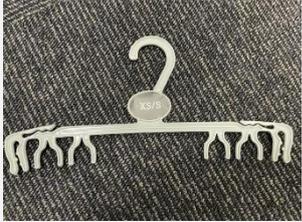

16.3 HANGERS FOR CHILDREN

<p>OUTERWEAR: JUNIOR/TEEN</p> <p>Length: 41 cm. Width: 13 mm. Hanger should be identical to picture.</p>	
<p>TOPS/DRESSES: JUNIOR/TEEN</p> <p>Length: 36 cm. Width: 10 mm. With non-slip and retention hook Hanger should be identical to picture.</p>	
<p>TOPS/DRESSES: KIDS</p> <p>Length: 33 cm. Width: 10 mm. Integrated top notches. Hanger should be identical to picture.</p>	
<p>TOPS/DRESSES: MINI</p> <p>Length: 27 cm. Width: 6 mm. Hanger should be identical to picture.</p>	
<p>SET OF TOPS/DRESSES</p> <p>MINI: length: 27 cm KIDS: length: 33 cm JUNIOR/TEEN: 36 cm</p>	
<p>SHORTS, LEGGINGS (EXCEPT 2/99), SKIRTS AND PANTS: JUNIOR/TEEN</p> <p>Length: 36 cm. Width: 23 mm. Adjustable soft rubber padded clips. Hanger should be identical to picture.</p>	

<p>SHORTS, LEGGINGS (EXCEPT 2/99), SKIRTS AND PANTS: MINI AND KIDS</p> <p>Length: 28 cm. Width: 23 mm. Adjustable soft rubber padded clips. Hanger should be identical to picture.</p>	
<p>SWEATPANTS 2/129: KIDS/JUNIOR</p> <p>Length: 24 cm. Width: 23 mm. Adjustable soft rubber padded clips. Hanger should be identical to picture.</p> <p>Pls note pants should be folded. If any questions, pls contact the Childrens department.</p>	
<p>LEGGINGS WITH 2/99 STICKER: MINI, KIDS AND JUNIOR/TEEN</p> <p>Length: 17 cm. Hanger should be identical to picture.</p>	
<p>SETS (EXCEPT PYJAMAS): JUNIOR/TEEN</p> <p>Length: 36 cm. Hanger should be identical to picture.</p>	
<p>SETS (EXCEPT PYJAMAS): MINI AND KIDS</p> <p>Length: 30 cm. Hanger should be identical to picture.</p>	

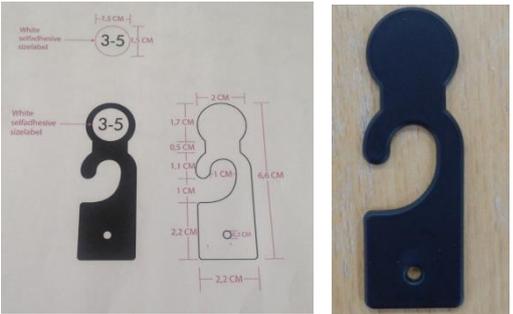

<p>PYJAMAS ONLY SETS:</p> <p>MINI size range Length: 25 cm. Hanger should be identical to picture.</p> <p>KIDS size range Length: 30 cm. Hanger should be identical to picture.</p> <p>TEEN size range Length: 36 cm. Hanger should be identical to picture.</p>	
<p>MICROFIBER UNDERWEAR: JUNIOR/TEEN</p> <p>Length: 27 cm. Hanger should be identical to picture.</p>

16.5 HANGERS FOR ACCESSORIES

ELONGATED HANGER FOR SCARFS	
HANGER SOFT GRIB	
HOOK	
HOOK FOR BELTS	
NEW SIZE HOOK	
SCARF HANGER	
KIDS SCARF HANGER	
TUBE SCARF HANGER	

16.6 HANGERS FOR SHOES

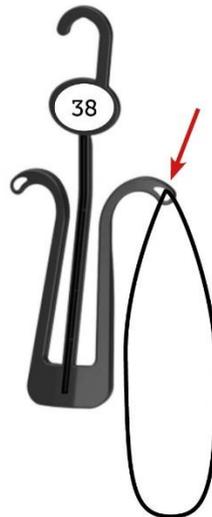

All hangers for shoes must be ordered at:
<https://phineasgroup.com/stock-products>
 +44 (0)845 838 633

IMPORTANT: Please include the hanger with the counter sample.

GENEREL INFO:

Place size stickers on the hanger

Important:
 Please use elastic bands and strap the band to the hanger. The hanger easily gets lost in the store if it is not strapped to the shoe. The elastic band only needs to go through one of the holes in the hanger.

PP112: for boots and converse style shoes.

PP119: clip with a non-rubber grip ideal for walking boots or others with a thick lining.

PP154: for flip-flops

PP146: Small kids, toddler shoes and ballerinas

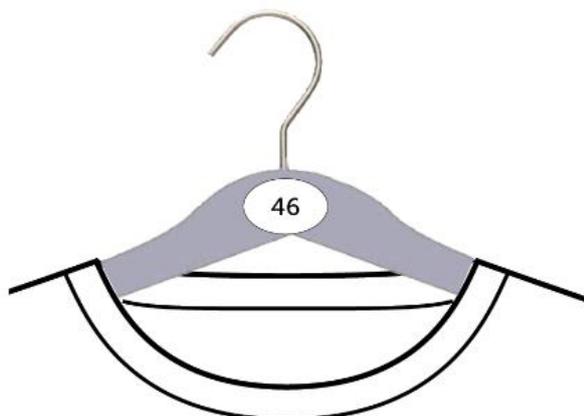

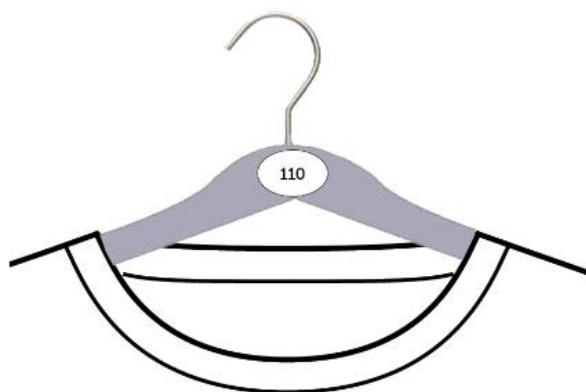

PP231 (18cm tall, 9cm wide): Women & Kids, slippers, shoes and ballerinas.

PP232 (21cm tall, 11cm wide): Men & Women for shoes, trainers and slippers.	
PP233 (25cm tall, 11cm wide): Men & Women for shoes, trainers and slippers.	

16.7 STICKERS FOR HANGERS

If required on PDF order sheet, please place sticker with size on one side of the hanger.

17 FOLDING INSTRUCTIONS

Information on packaging of cartons and logistical requirements can be found in the “Packing instructions – Nonfood”, via this link <https://sallinggroup.com/en/contact/suppliers>.

Garments should be folded and packaged so they fit in a carton with measurements:

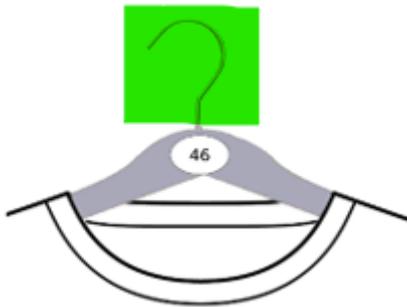

Length 600 mm = 60 cm

Width 400 mm = 40 cm

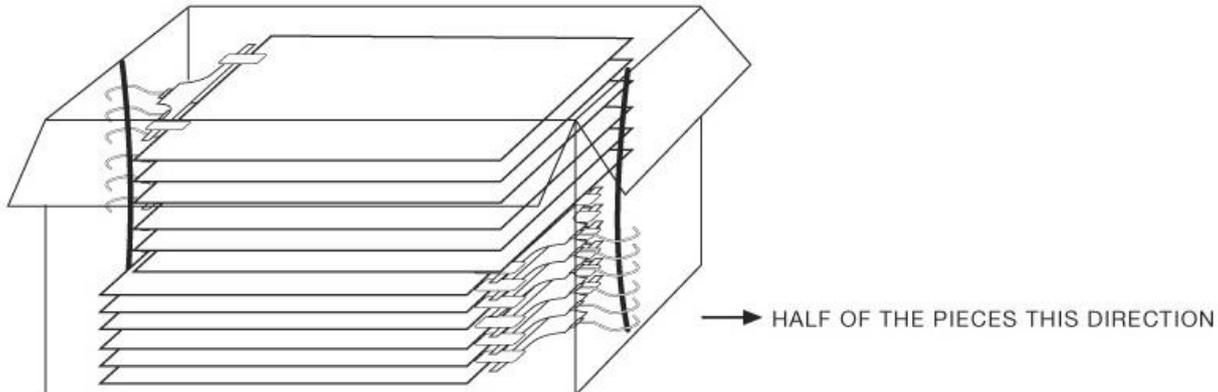

Height between 100-500 mm = 10-50cm.

If the garment/assortment cannot fit within these limits, please reach out to buying department to find an individual solution for that specific product.

Hanger hook must face to the left-hand side when looking at the front of a garment. See below picture.

For all orders with hangers place half the pieces with hanger in one direction and the other half with hangers facing the opposite direction. See illustration.

In the following section folding instructions are included. If any further questions regarding this subject, please contact the relevant buying department.

17.1 MEN'S WEAR

17.1.1 MEN'S PANTS WITH HANGER

Each assortment must be packed in one master polybag,

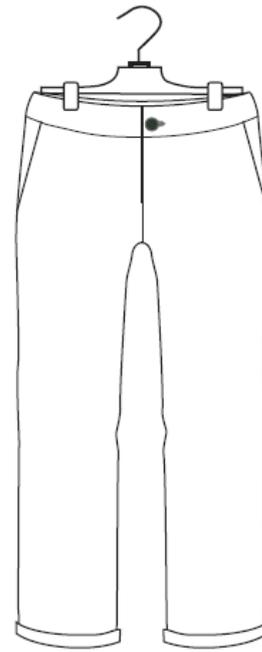

No use of single polybag or tissue paper.

All garments should be packed in the same direction.

Folding measurements:

Width: 24 cm

Length: 37 cm

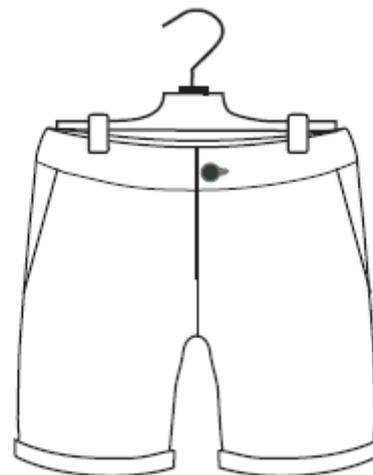

17.1.2 MEN'S SHORTS WITH HANGER

Each assortment must be packed in one master polybag,

No use of single polybag or tissue paper.

All garments should be packed in the same direction.

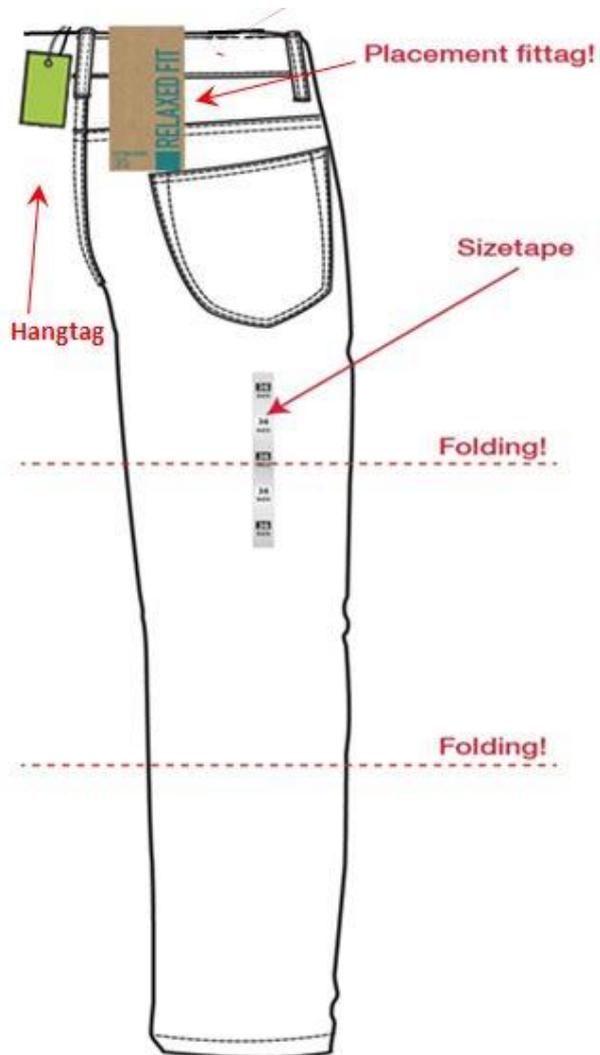

17.1.3 MEN'S PANTS WITHOUT HANGER

Back out no size tape and with size tape

The folding shown here are also the one to be applied for Pants no hanger, back out with/no size tape plus fitting flasher.

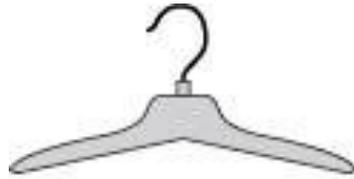

IMPORTANT! Kindly make sure that the pants are folded NO MORE than the two times as shown in the picture.

Please make sure that the hangtag is fastened to the Master Label at the back inside the pants.

17.1.4 MEN'S TOP WITH HANGER

It is important that the hanger is shoved down in the shirt as in the picture.

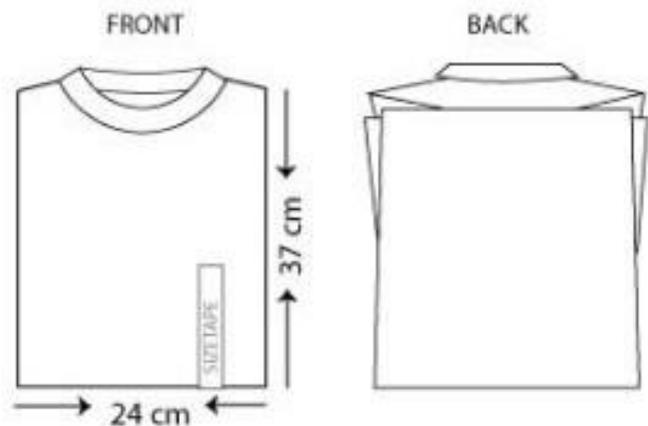

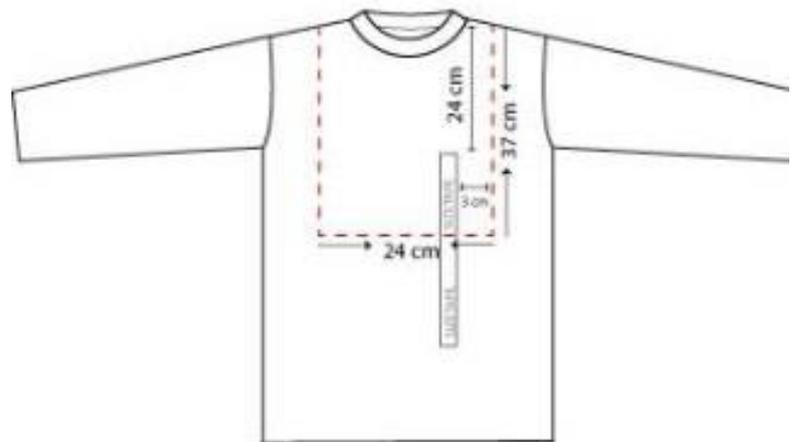

17.1.5 MEN'S TOP WITH SLEEVE FOLDED – WITHOUT HANGER

Folding measurement

Width: 24 cm

Length: 37 cm

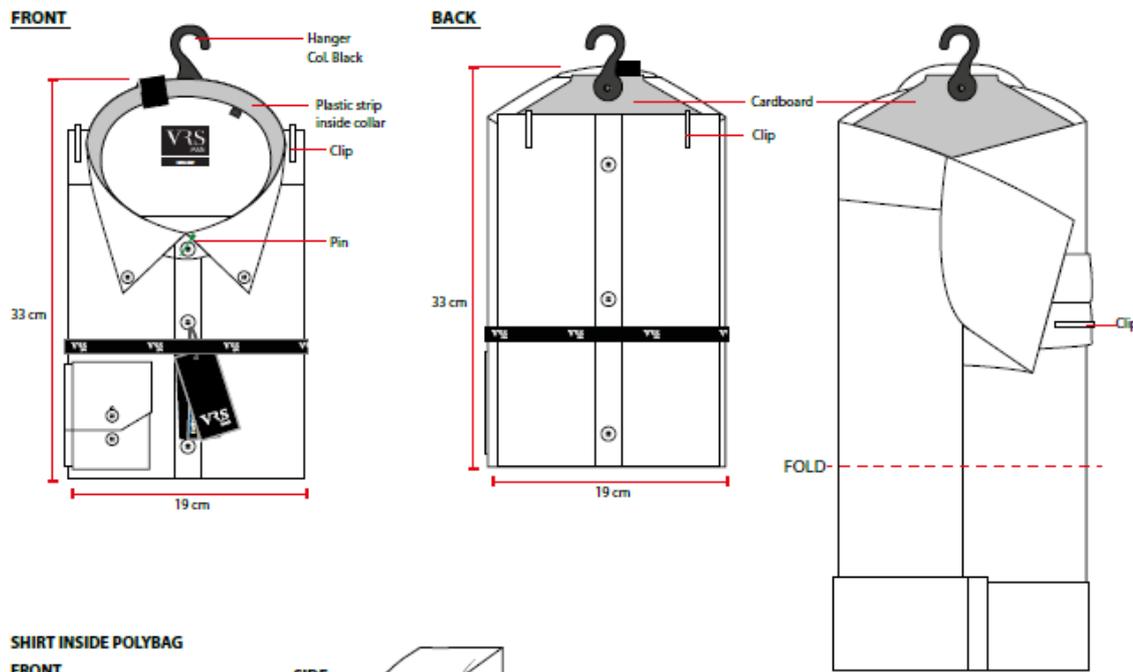

Please attach size tape 24 cm. from top shoulder, 3 cm from folding edge

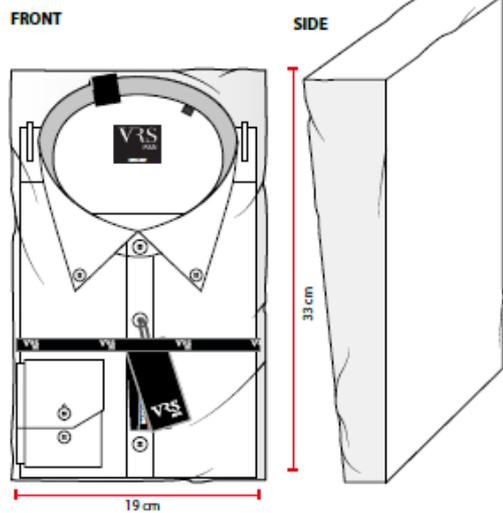

ALL GARMENTS SHOULD BE FOLDED IN THE SAME DIRECTION

17.1.6 MEN'S SHIRT IN POLYBAG

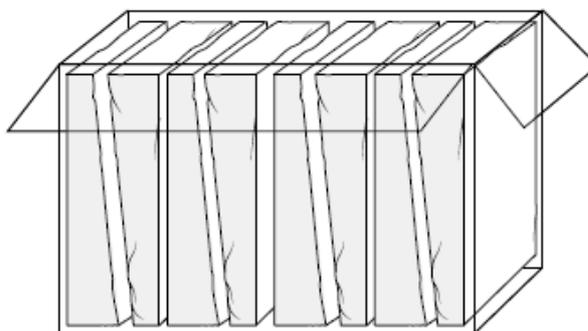

SHIRT PACKING GUIDE

SHIRT INSIDE POLYBAG

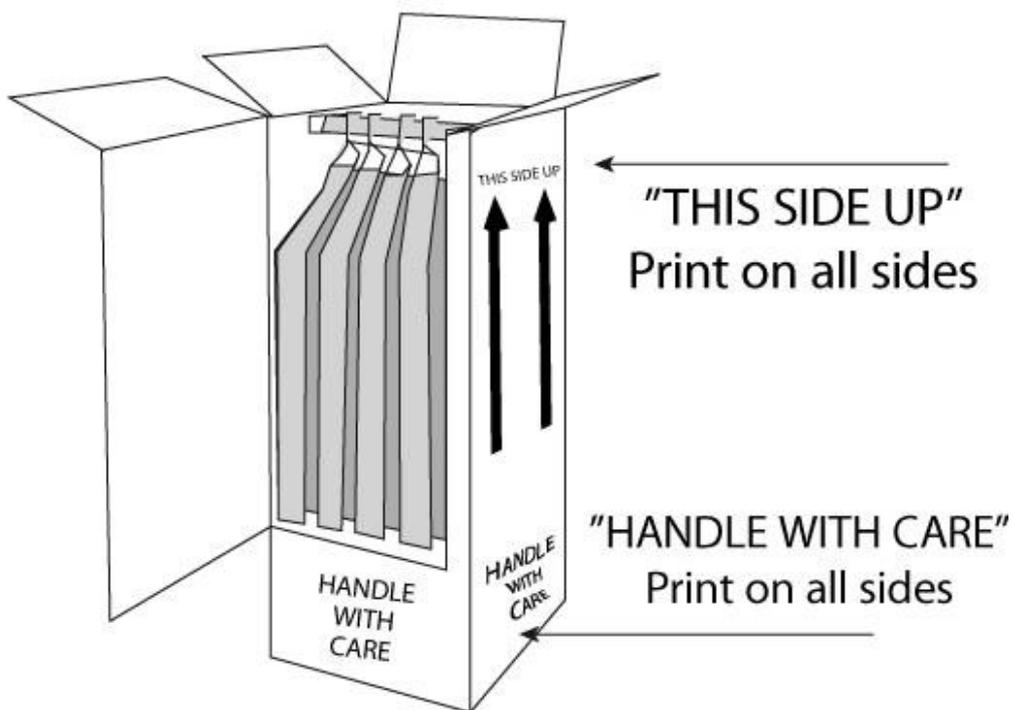

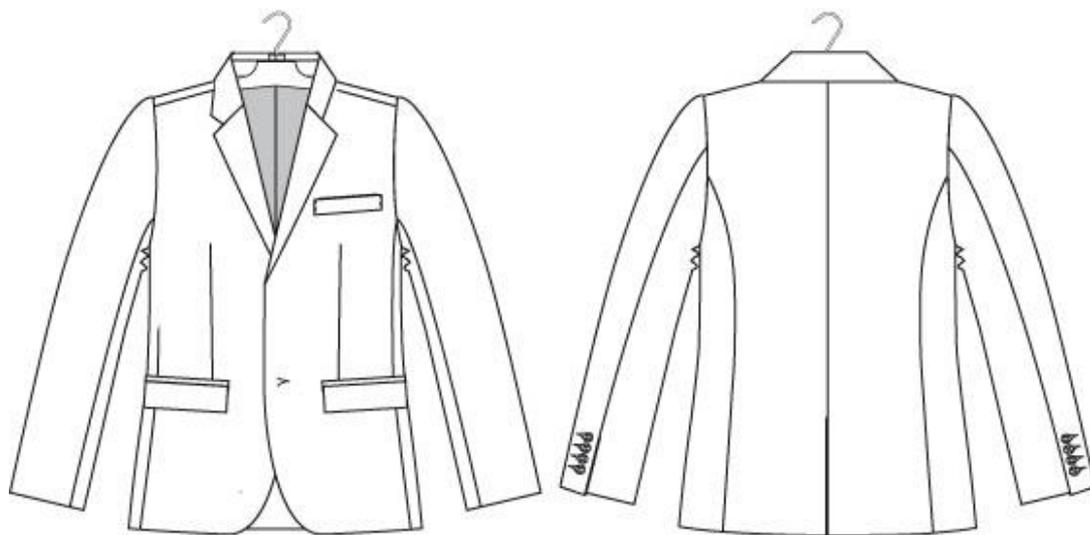

Garments must be packed in opposite direction

Each assortment must be packed in 1 master polybag. No use of single polybags or tissue paper. Half of the assortment must be packed in opposite direction.

17.1.7 MEN'S HANGING DELIEVERY, SUIT BLAZER WITH HANGER

PACKING INSTRUCTIONS FOR TOP ON HANGER

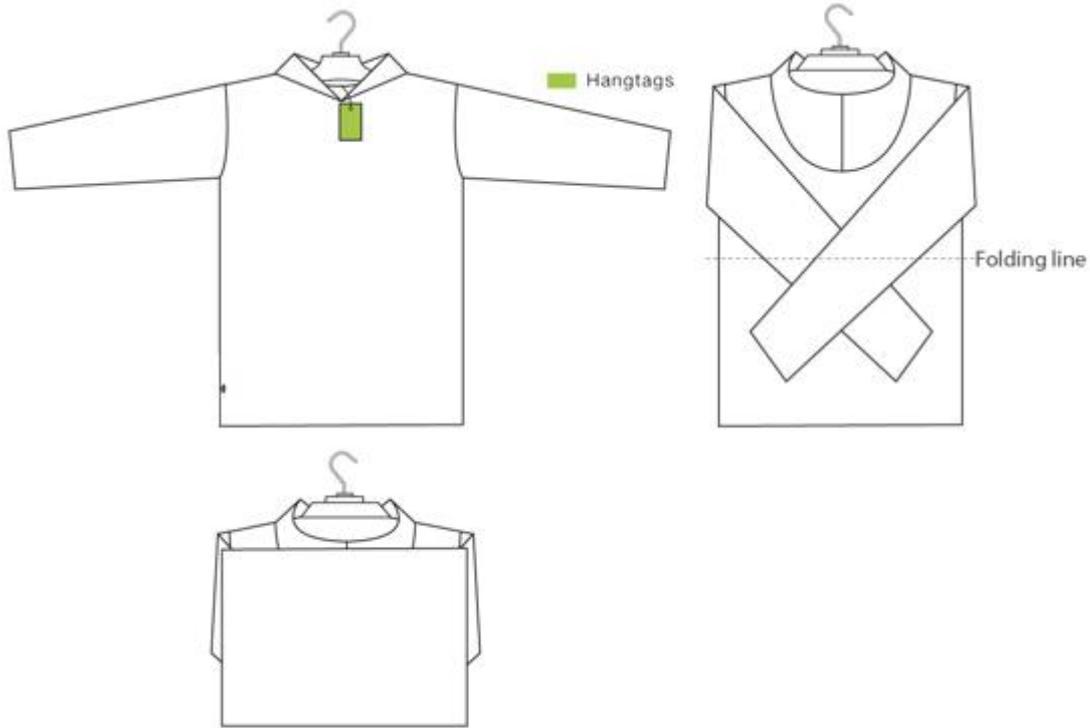

Carton size approx.
508 x 457 x 1245 mm

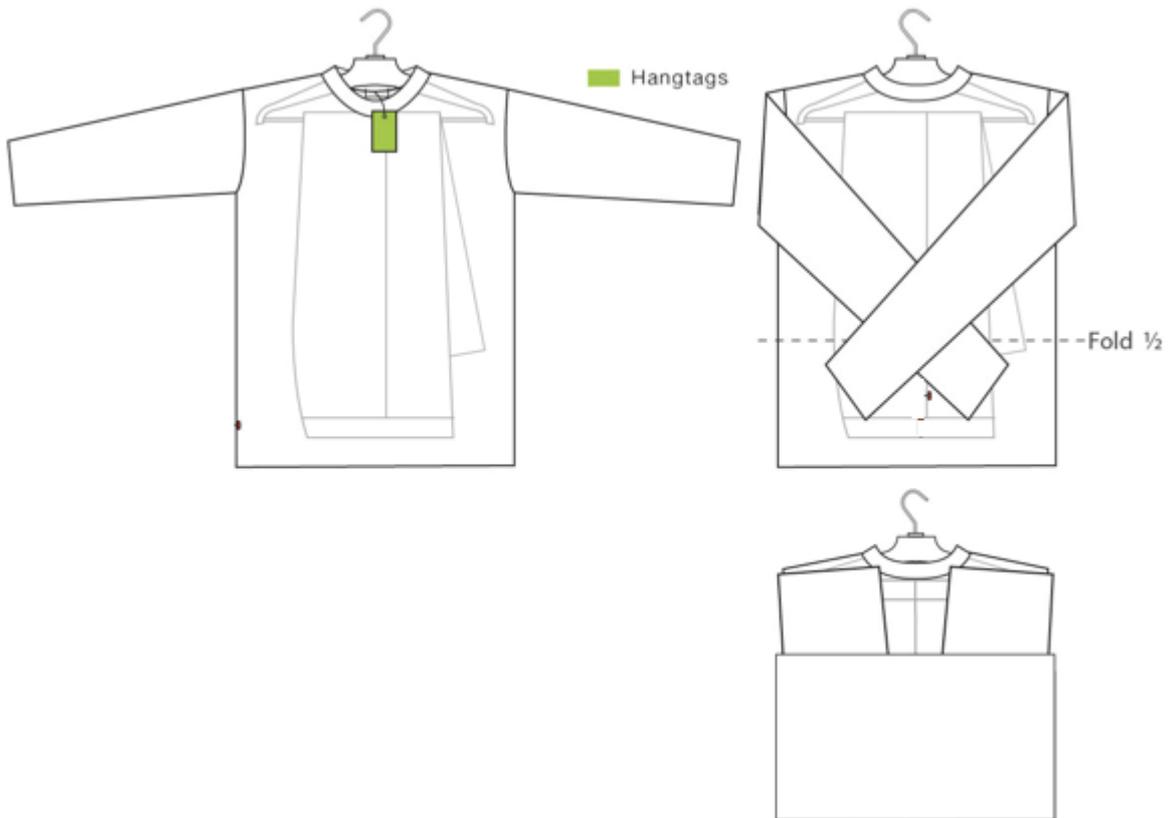

Each garment must be packed in polybags and fastened at hanging rail. Please make sure garments cannot fall off during transport.

Packed in hanging carton, approximate size 508*457*1245 mm. Print "handle with care" and "This side up" on all sides.

17.1.8 MEN'S JACKET / BLAZER / SWEATER WITH HOOD – WITH HANGER

17.1.9 MEN'S NIGHT WEAR / HOME WEAR

17.2 WOMEN'S WEAR

Garments should always be folded so they fit in a carton with below illustrated measurements:

Length 600 mm = 60 cm

Width 400 mm = 40 cm

Height between 100-500 mm = 10-50cm.

If the garment/assortment cannot fit within these limits, please reach out to buying department.

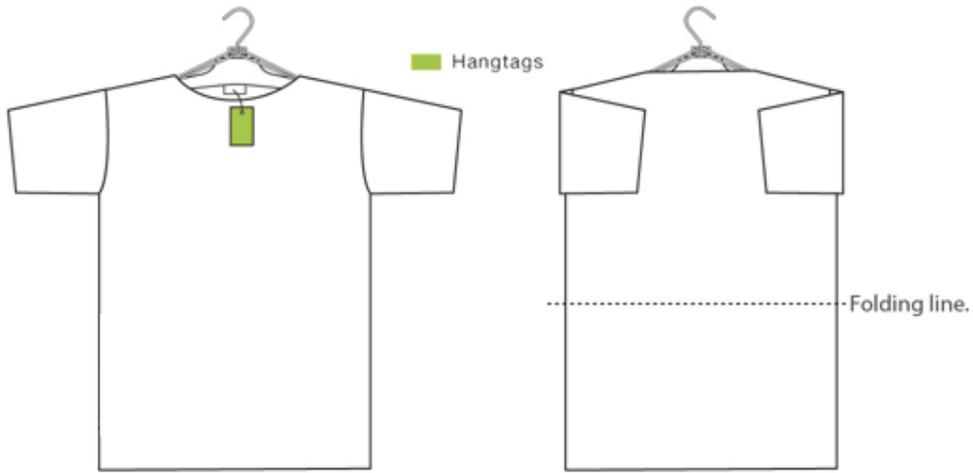

1. Max dimensions: 60 cm x 40 cm x 10-50 cm is your friend

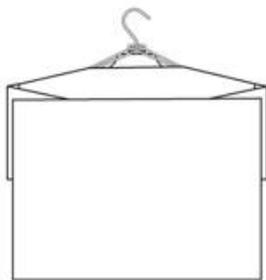

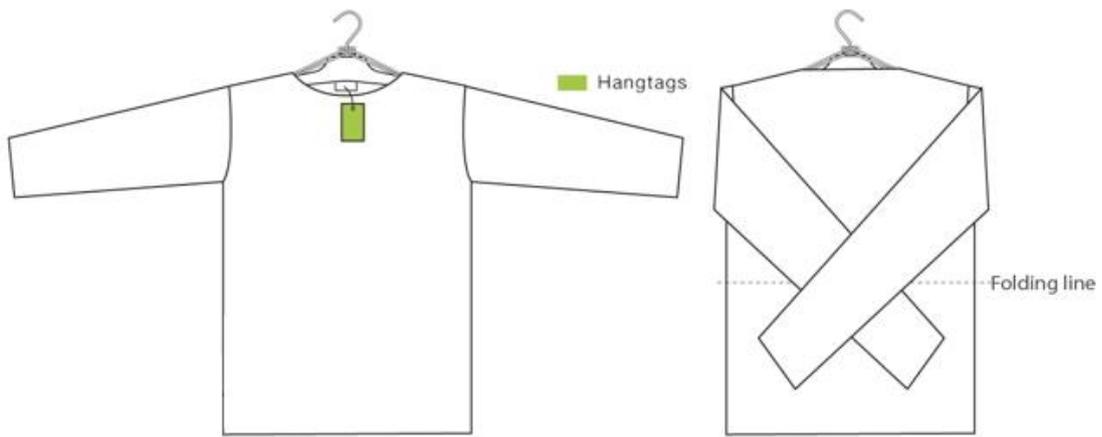

17.2.1 UPPER PARTS

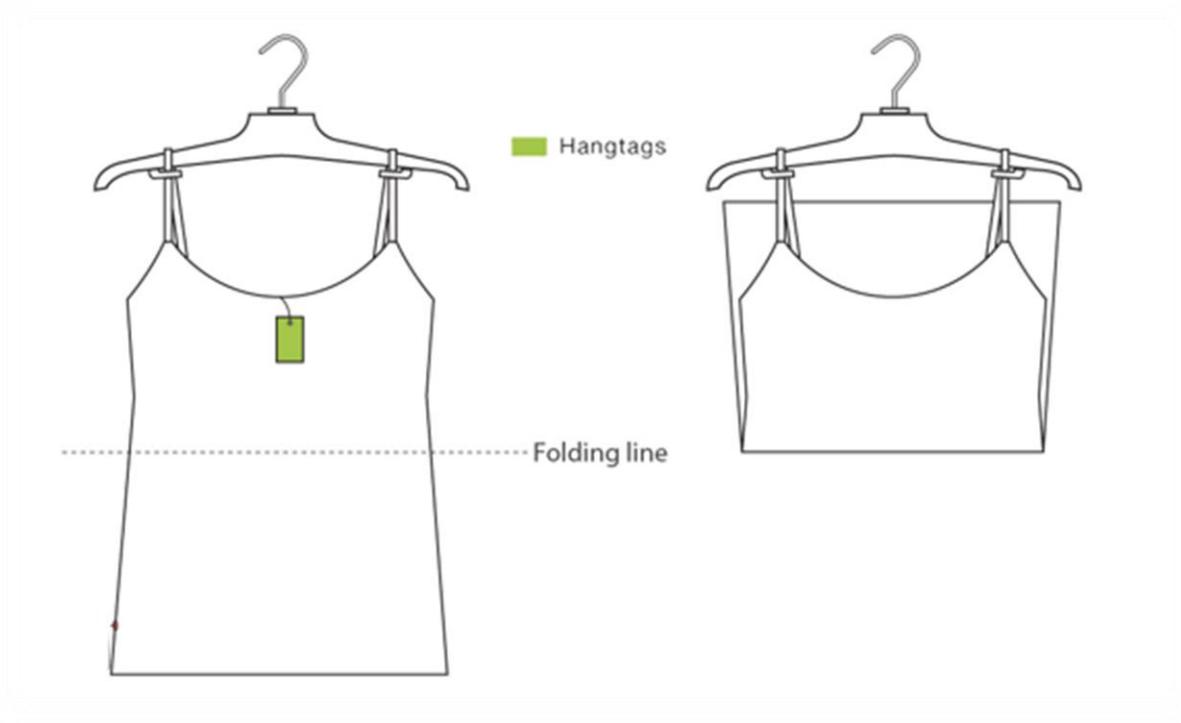

17.2.1.1 TOP, T-SHIRT, SWEATSHIRT, SWEATER, BLOUS, SHIRT AND SHORT JACKET/OUTERWEAR

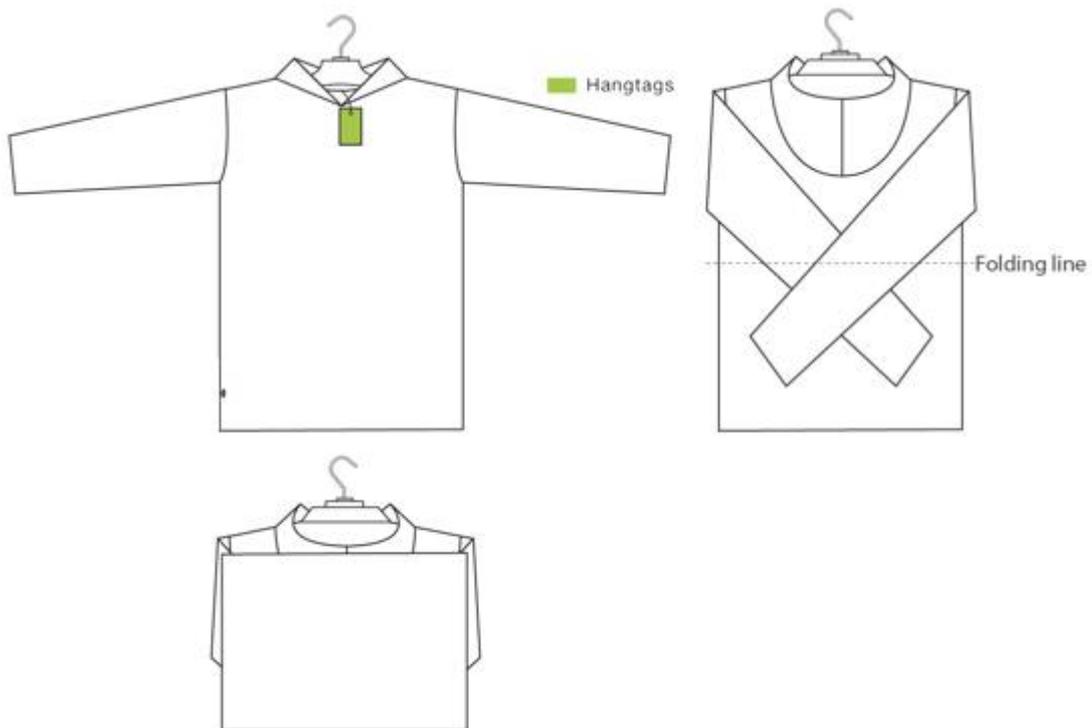

Below illustrations apply to tops with:

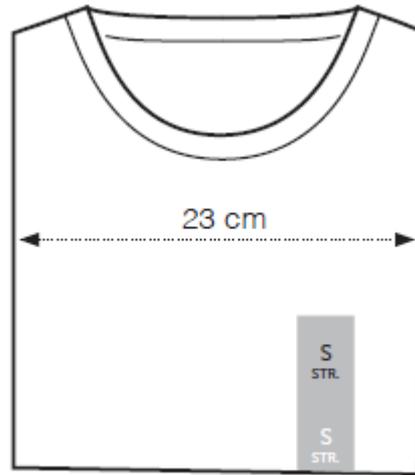

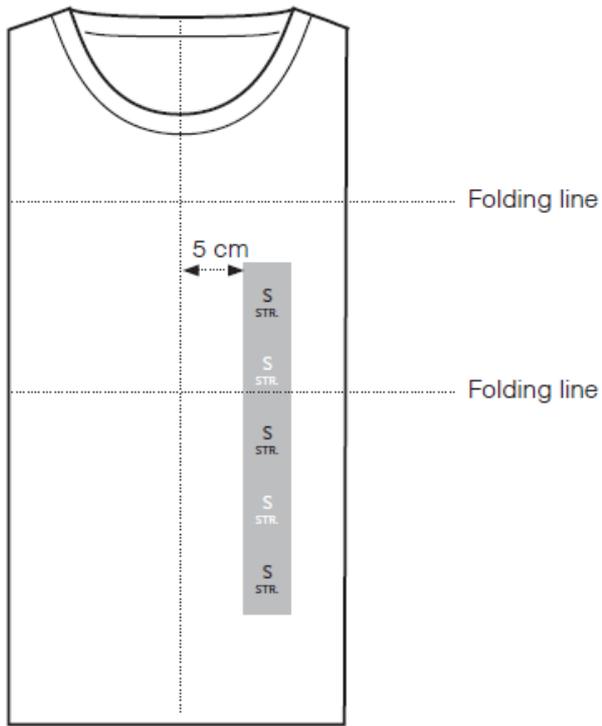

- Short sleeves, long sleeves and no sleeves.
- With hanger
 - If there is high risk the garment will slide off the hanger, discuss adding hanger loop with buying department
- Without hanger and with size tape
- With hood

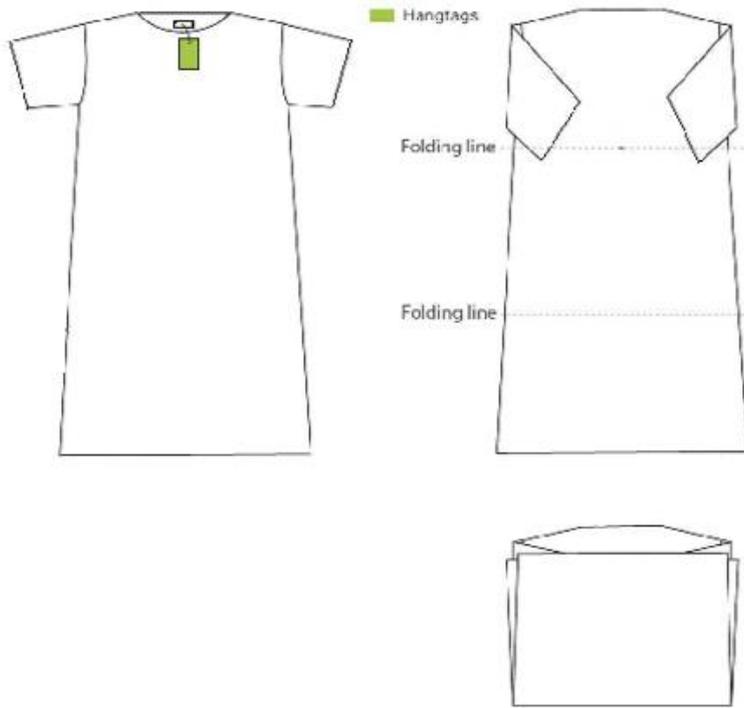

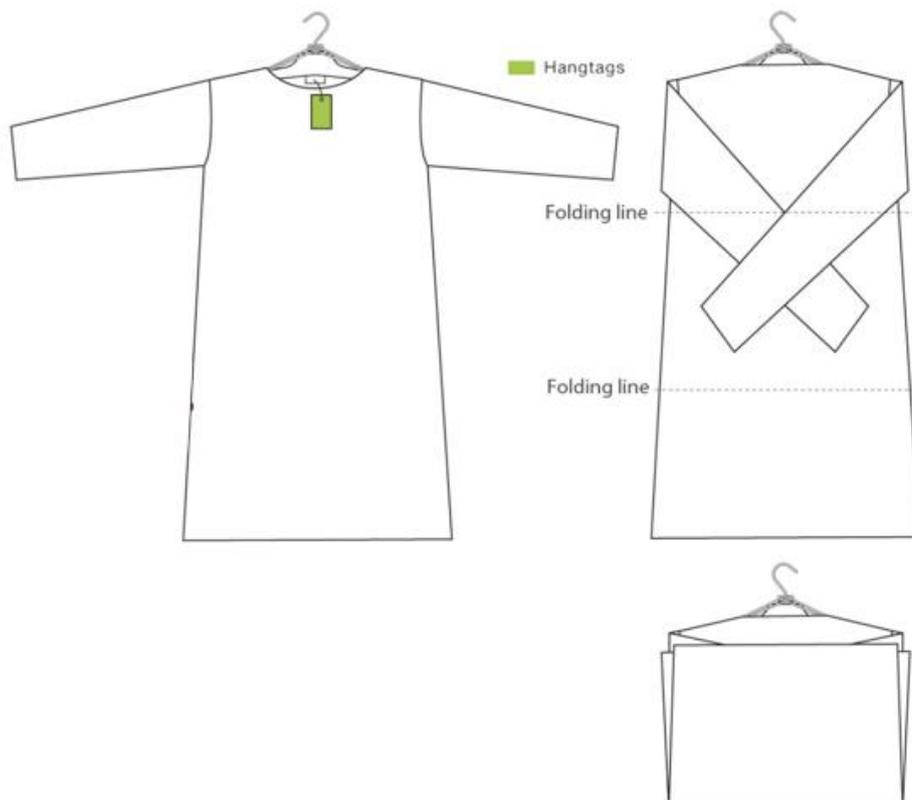

17.2.1.2 DRESS, TUNIC, LONG TOP, LONG JACKET AND OUTERWEAR

Below illustrations apply to garments with:

- Short sleeves, long sleeves and no sleeves.
- With hanger
 - If there is high risk the garment will slide off the hanger, discuss adding hanger loop with buying department
- Without hanger and with size tape

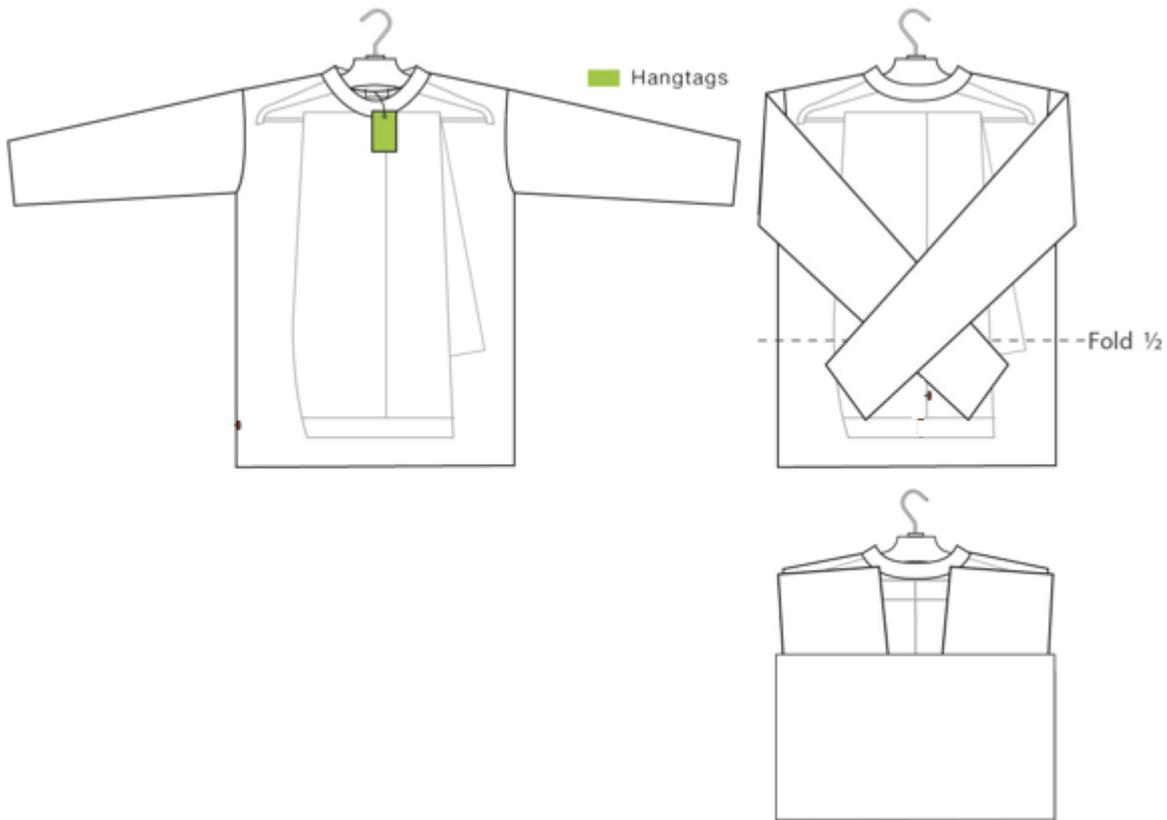

17.2.1.3 NIGHT WEAR AND HOME WEAR – SETS

Below illustrations apply to sets of night wear and home wear with:

- Short sleeves, long sleeves and no sleeves.
- Short legs and long legs
- With hanger

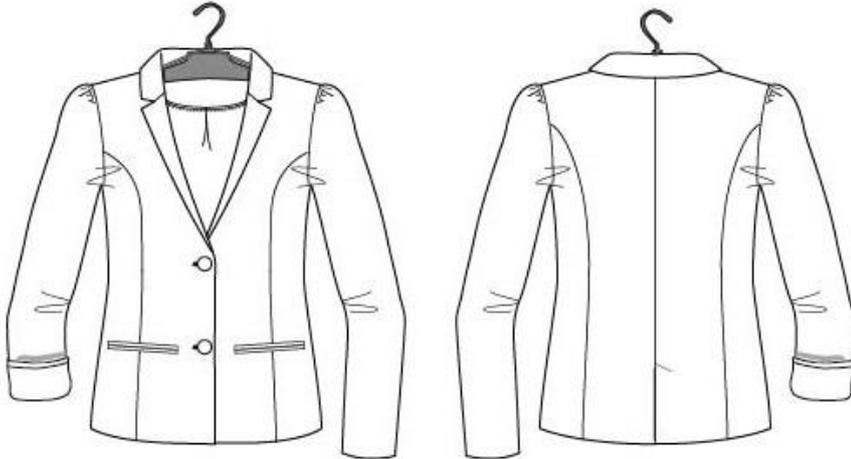

17.2.1.4 BLAZER

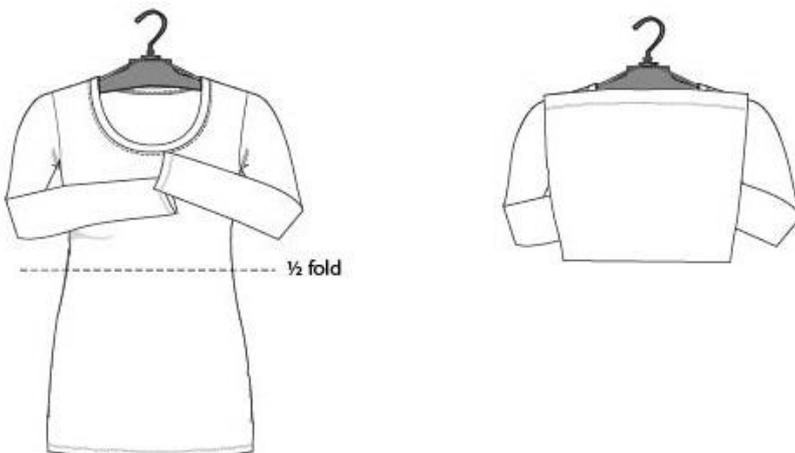

Below illustrations apply to blazers with:

- Short sleeves, long sleeves and no sleeves.
- With hanger
 - Make sure the hanger is strong and sturdy enough to hold heavy garments
 - If there is high risk the garment will slide off the hanger, discuss adding hanger loop with buying department

Folding instruction for blazer jacket

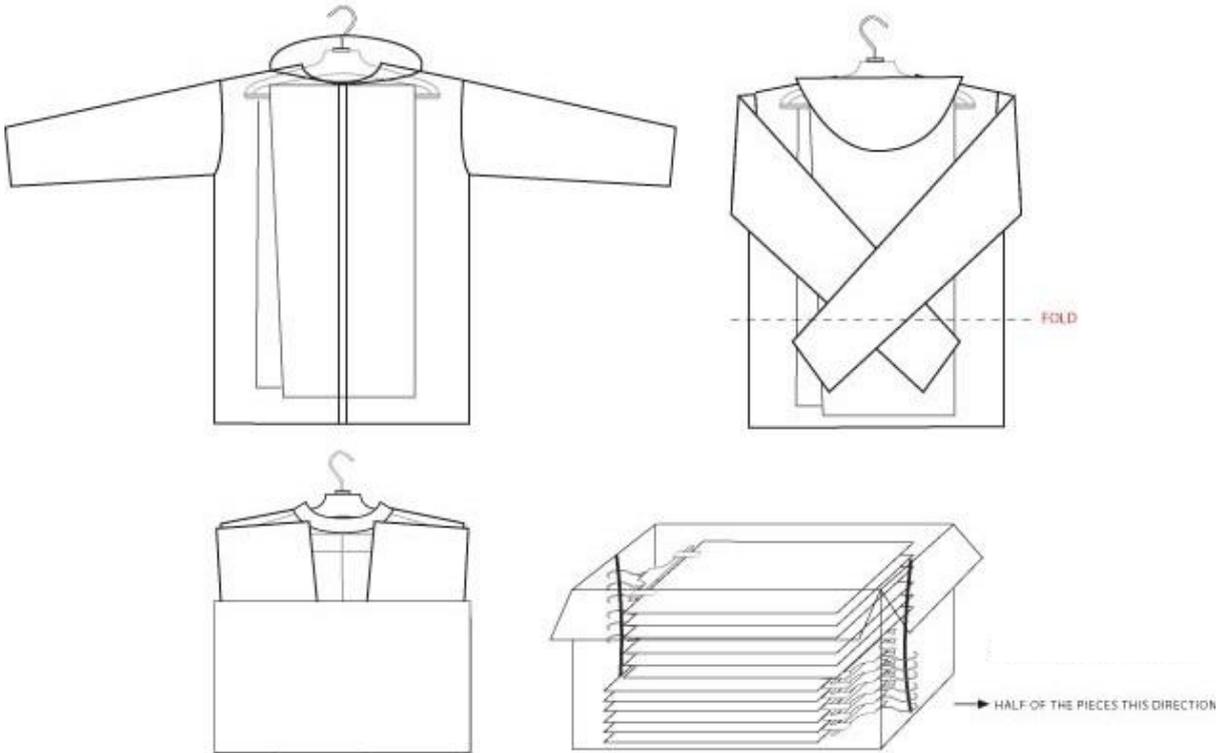

Folding - same principle as for a top, shown below

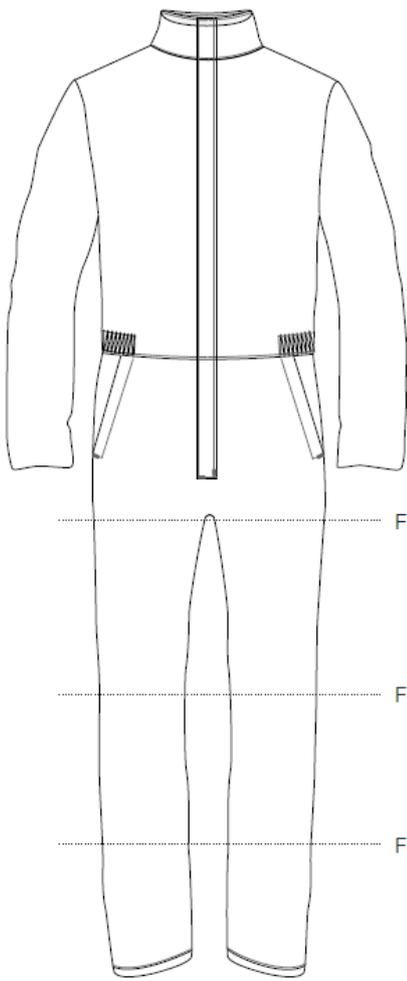

17.2.1.5 OUTERWEAR, RAINWEAR, WHOLESUIT

Below illustrations apply to:

- Sets of outerwear
- With short sleeves and long sleeves
- With hanger

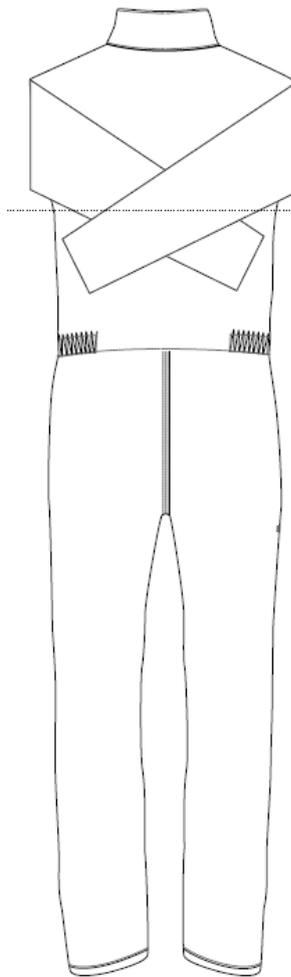

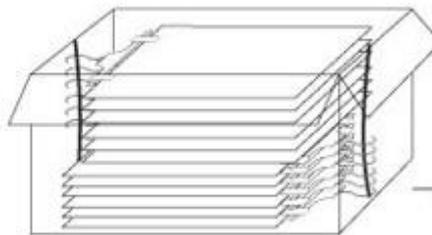

Folding line

Folding line

Folding line

Folding line

→ HALF OF THE PIECES THIS DIRECTION

17.2.2 LOWER PARTS

17.2.2.1 SHORTS, PANTS AND SKIRTS

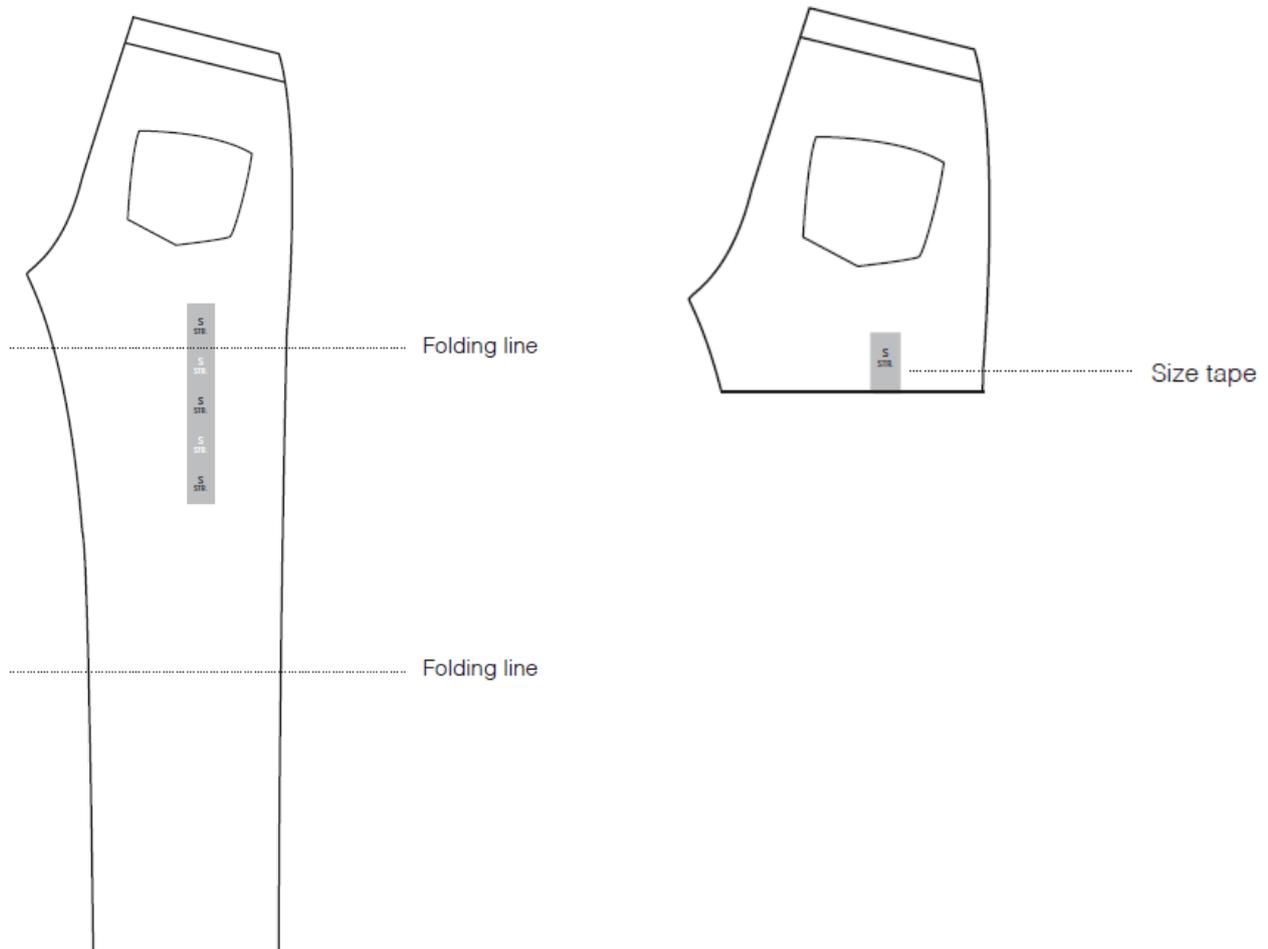

Below illustrations apply to shorts, pants and skirts with:

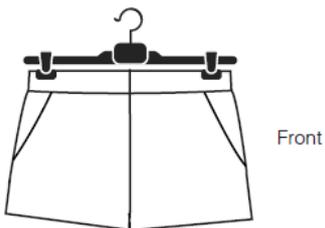

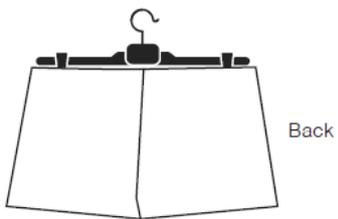

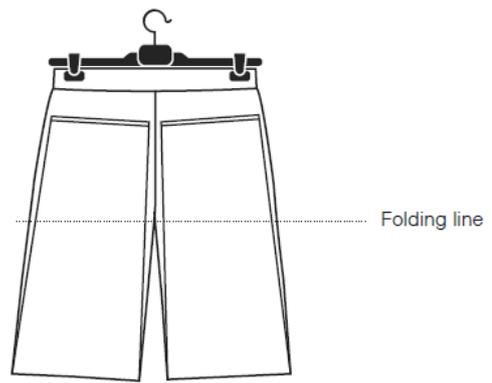

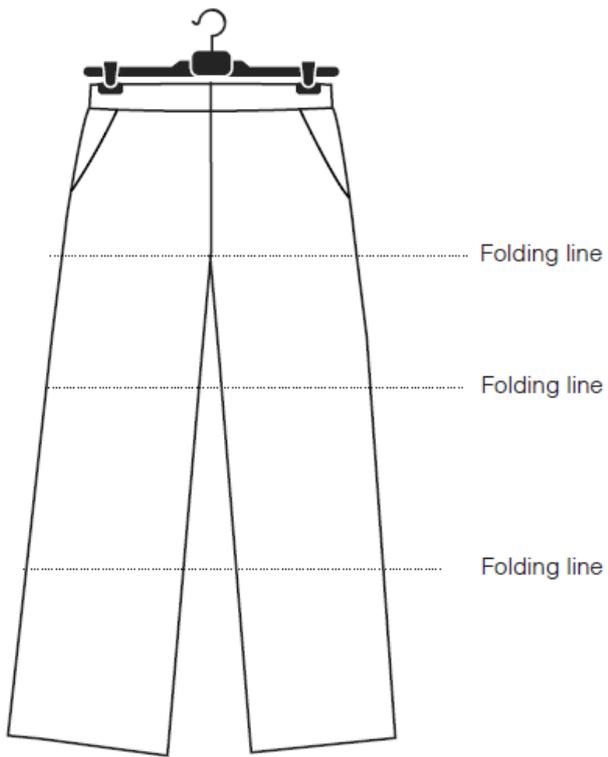

- Short and long length
- Without hanger and with size tape
- With and without fitting flasher
- With hanger
 - Make sure the hanger is strong and sturdy enough to hold heavy garments – e.g. jeans
 - Note that clothespins should only be fastened to the waist band.
 - Legs must be folded without being fastened in the clips of the hanger

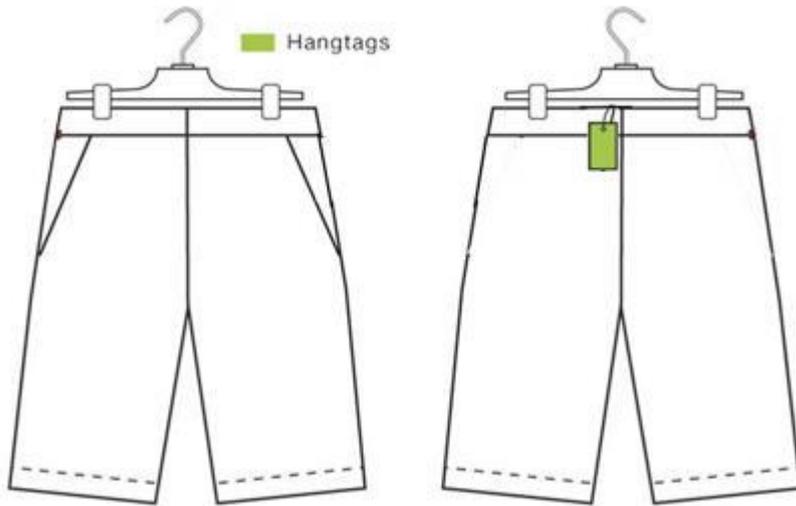

Kindly make sure that the pants are folded NO MORE than the two times as shown in the picture.

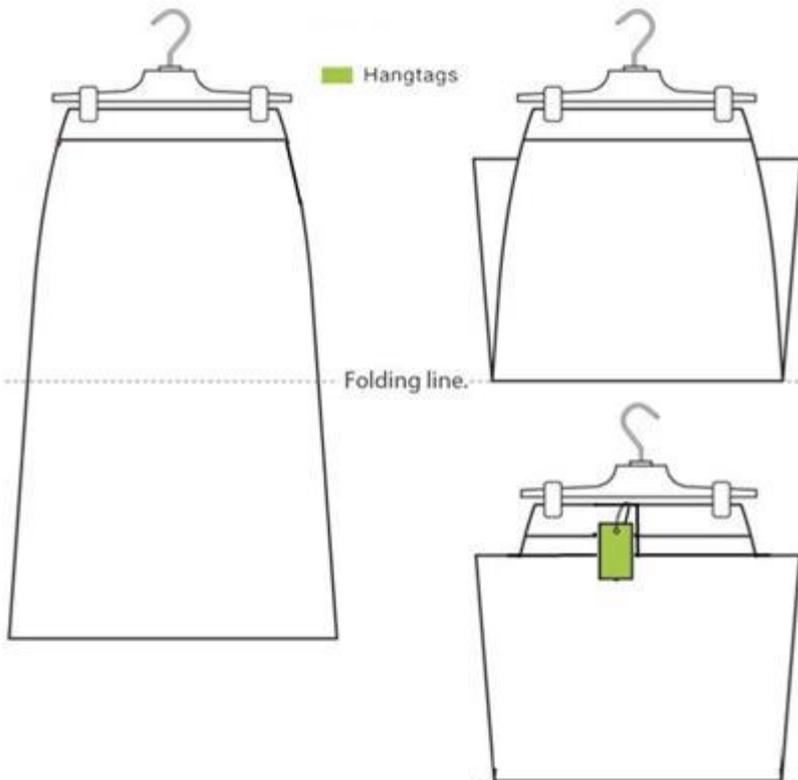

Please make sure that the hangtag is fastened to the woven VRS Label at the back inside the pants.

- Back side of pants out as standard – as the picture
- Front side of pants out if there are details on the front of the pants.

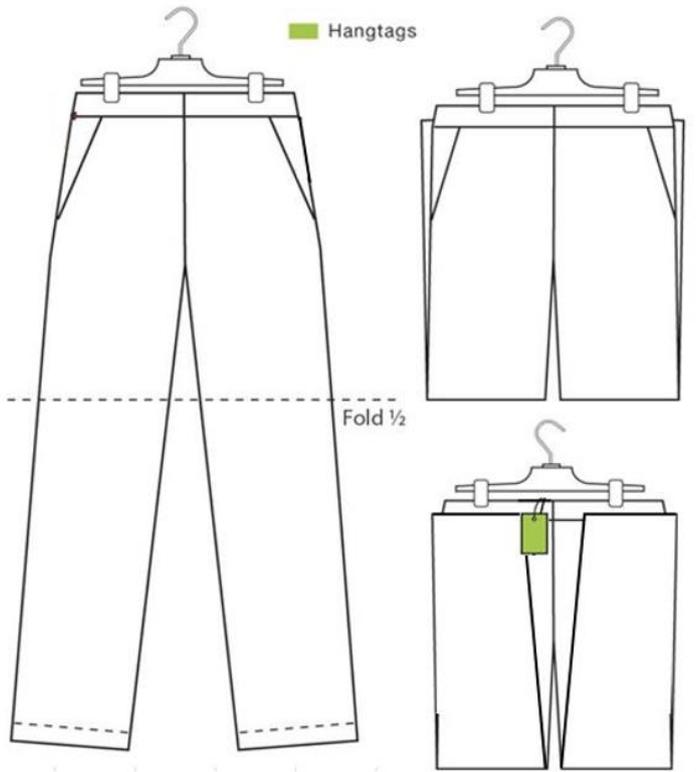

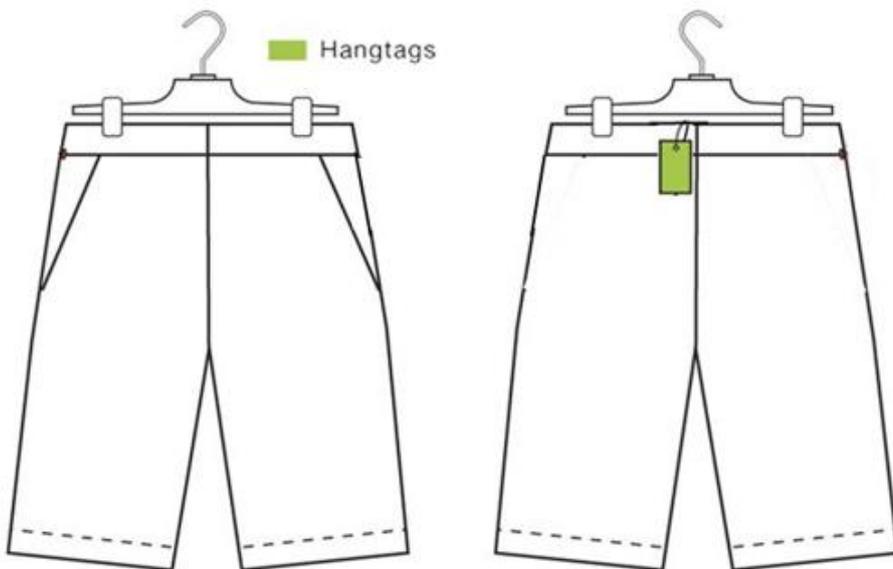

17.3 CHILDREN'S WEAR

17.3.1 CHILDREN'S PANTS WITH HANGER

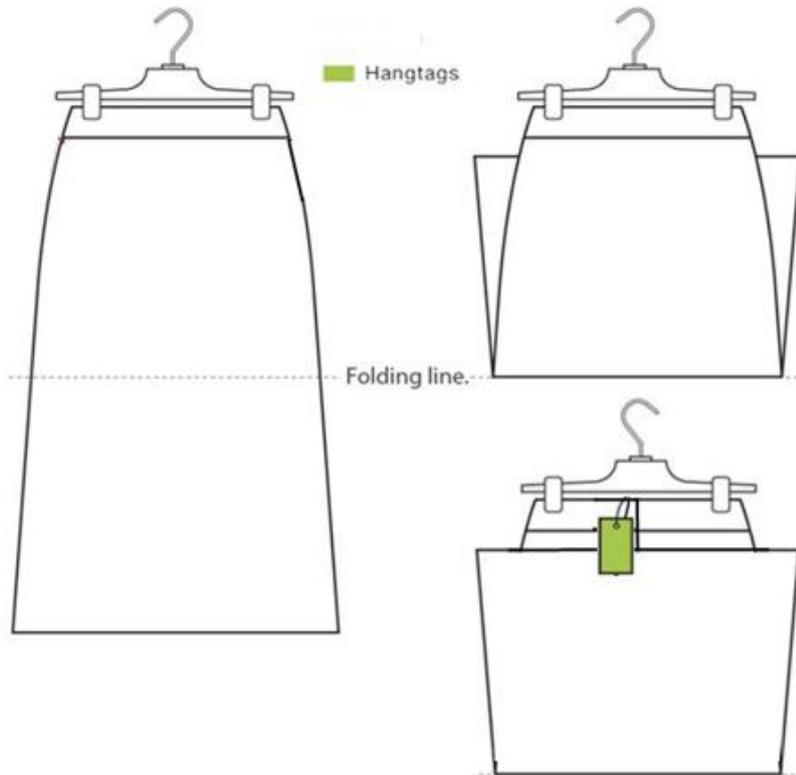

Note that clothespins should only be fastened to the waist band. Legs must be folded without being fastened.

17.3.2 CHILDREN'S SHORTS WITH HANGER

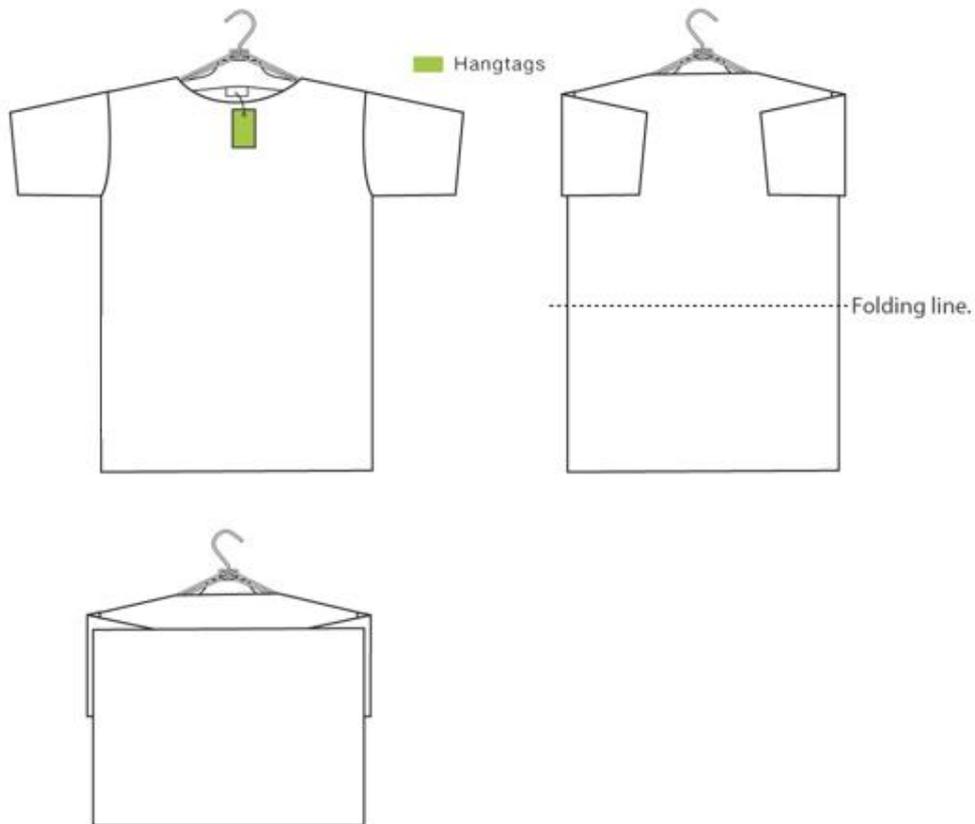

Please make sure that the hangtag is fastened to the Master Label at the back inside the shorts.

17.3.3 CHILDREN'S SKIRTS WITH HANGER

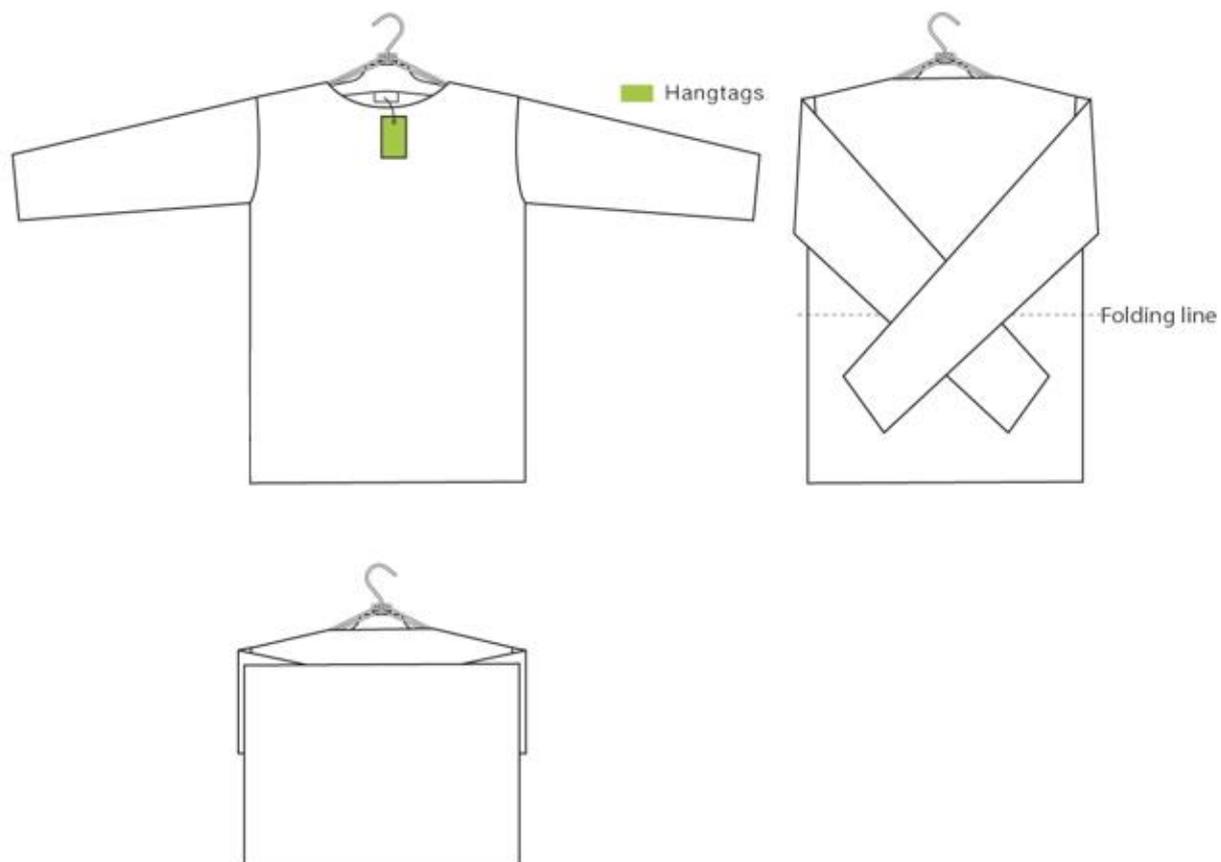

Please make sure that the hangtag is fastened to the Master Label at the back inside the skirt.

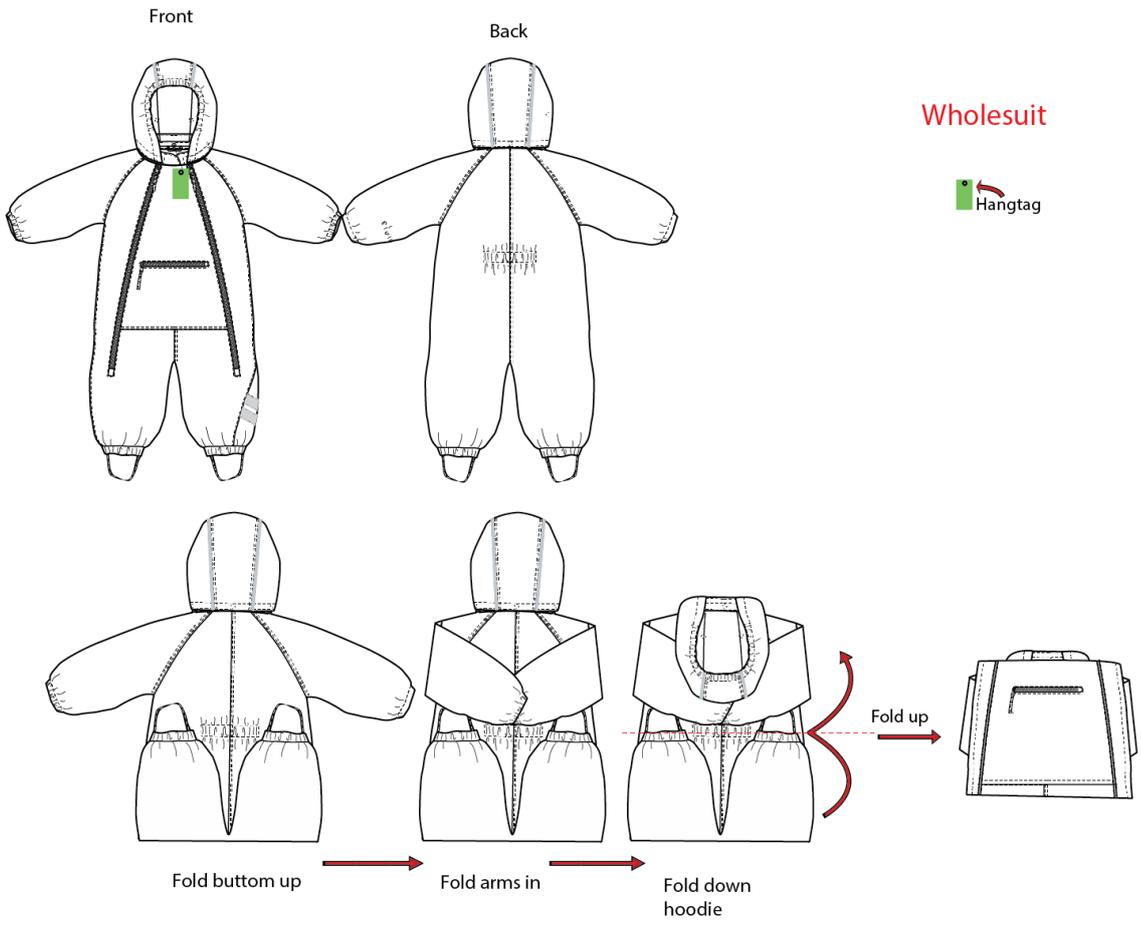

17.3.4 CHILDREN'S T-SHIRT- WITH OR WITHOUT HANGER

17.3.5 CHILDREN'S T-SHIRT LONG SLEEVE – WITH OR WITHOUT HANGER

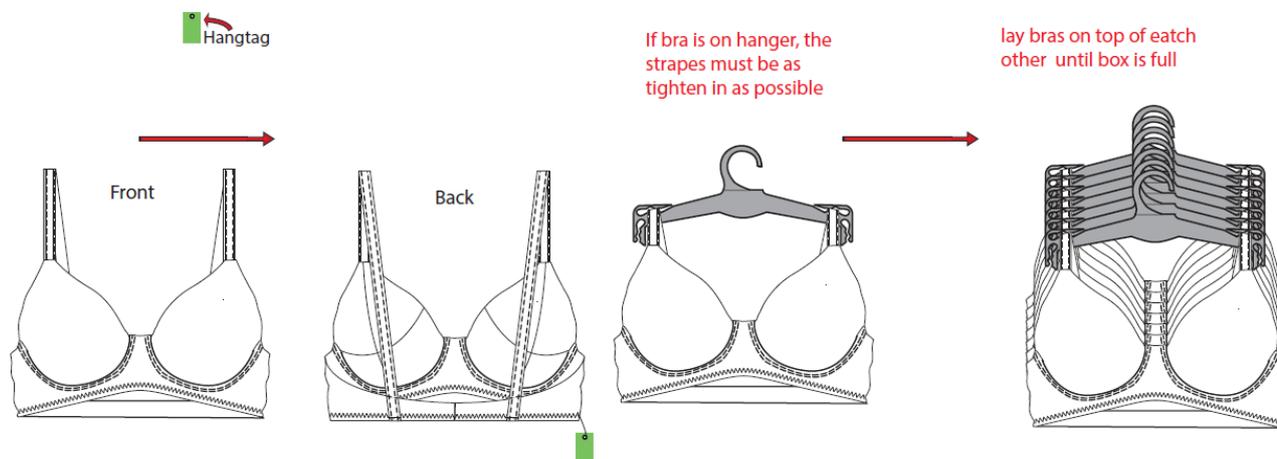

17.3.6 WHOLE SUIT / SNOWSUIT

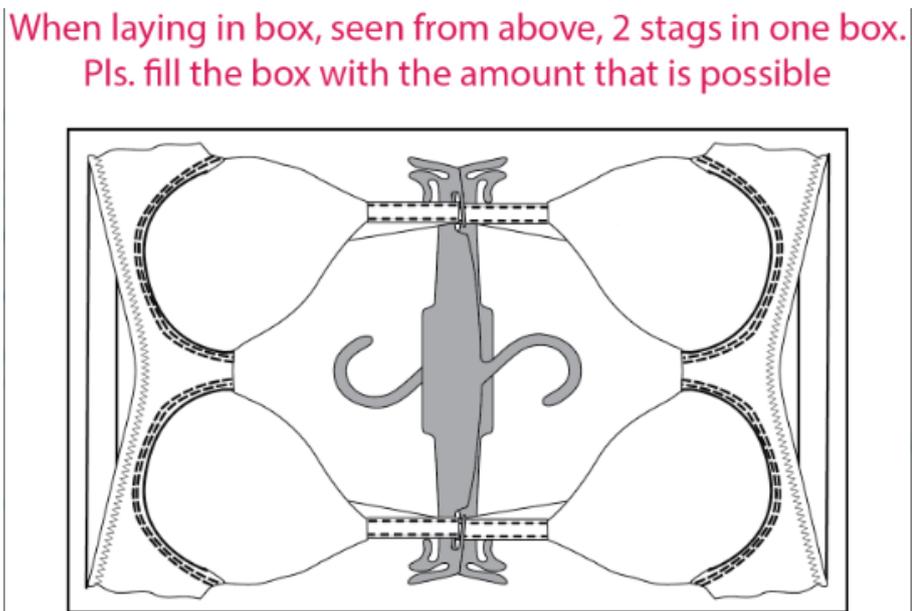

17.4 UNDERWEAR

17.4.1 BRA ON HANGER

To save space in the packing process below method might be used. Divide 1 stacks of bras into 2 stacks and fill the box as the picture below:

17.5 SHOES

When packing the shoes please keep the boxes as simple as possible for the stores to unpack. Please also keep in mind NOT to use too big boxes when packing the shoes, as it will have high costs both for you and for us.

Our requirement is that you pack the shoes in boxes with only one polybag inside of the box (please make sure to fold the polybag. DO NOT tie the polybag).

Afterward you need to divide the box into cells, so each shoe has a compartment for itself. It is also allowed to put 2 pairs of shoes inside one cell if this is better.

When packing the shoes use Micro-Pak® products to ensure that mold does not grow on the shoes.

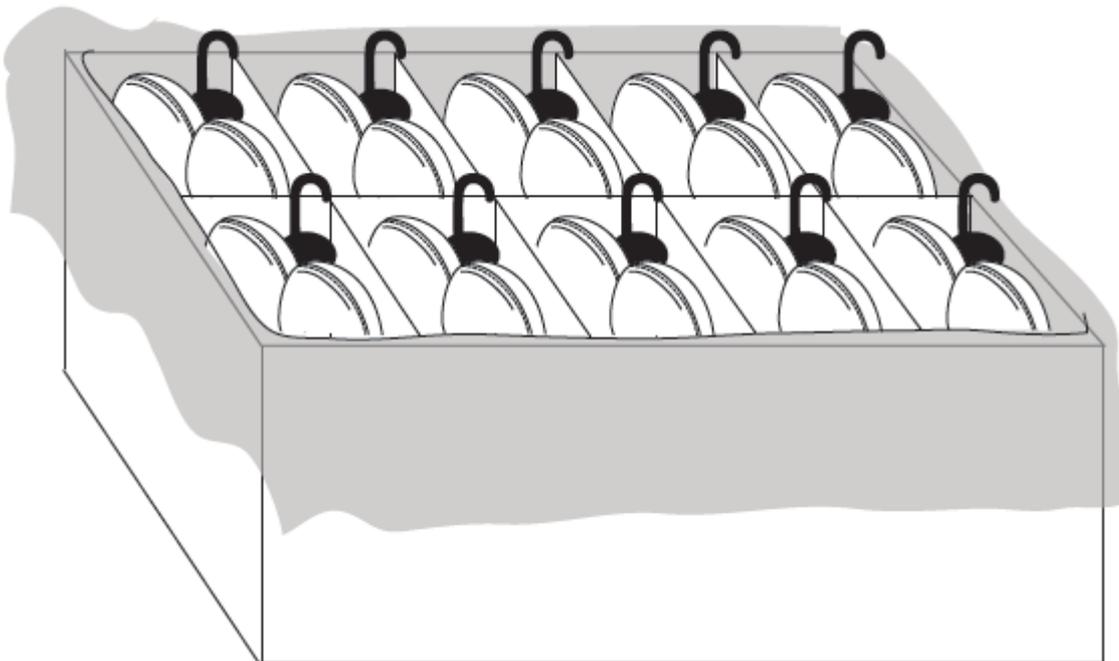

Please also use Micro-Pak® Container Desiccants in the containers during the rainy seasons to further prevent moisture damage.

More information can be found:

MPCD eco container desiccants - <https://www.micropakltd.com/en/products/micro-pak-mpcd-eco>

PE Sheets (<https://www.micropakltd.com/en/products/micro-pak-pe-sheets>).

Please see the picture below for illustration:

Important: Do NOT put any paper inside the shoes. If you fear that this will damage the shoes during transportation, please discuss the matter with the Salling Group shoes buying department.

In case of violation of this term Salling Group, Textile reserves the right to re-invoice any charges to you, which might occur during the remedying process.

NOTE: always make sure that the goods are packed according to PDF order sheet with correct barcodes on the goods and the boxes. Please also check the PDF order sheet for special requirements regarding labeling, packing and so forth.

18 PACKAGING INSTRUCTIONS

For information on correct packaging, kindly see the “Packing instructions – Nonfood”, found via this link <https://sallinggroup.com/en/contact/suppliers>.

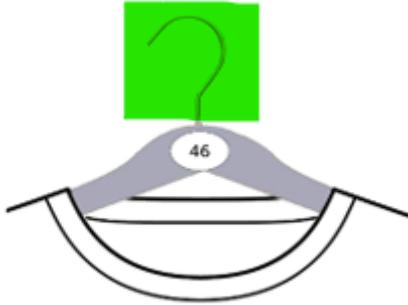

In case of questions / remarks, please reach out to logisticsfeebf@sallinggroup.com

Each assortment must be packed in one master polybag. No use of single polybags or tissue paper.

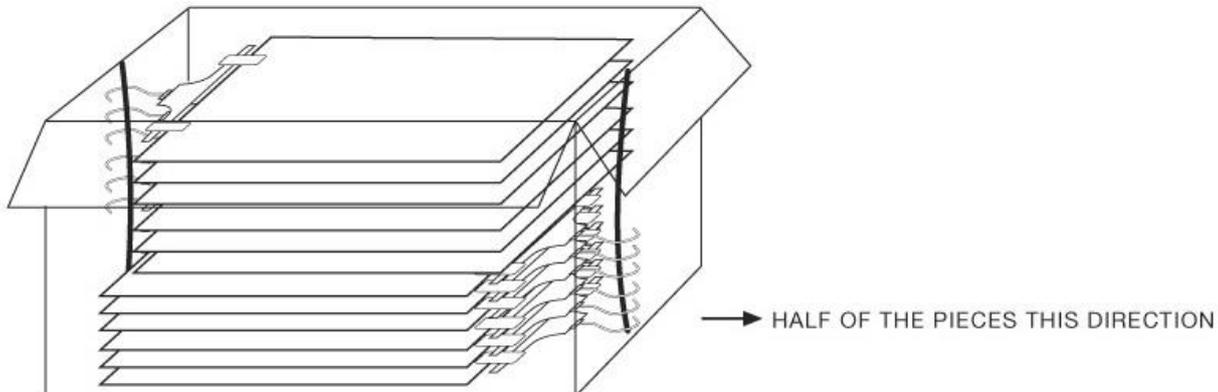

Polybag quality: Polyethylene (PE) or Polypropylene (PP).

Kindly be aware that the Textile chemical restrictions policy, also applies for materials used for packaging, see [TEXTILE CHEMICAL RESTRICTION POLICY](#) and [SVHC - SUBSTANCES OF VERY HIGH CONCERN](#).

Hanger hook must face to the left-hand side when looking at the front of a garment. See below picture.

For all orders with hangers place half the pieces with hanger in one direction and the other half with hangers facing the opposite direction. See illustration below.

18.1 PACKAGING RULES TO REMEMBER

Rules to remember

... Ask the question: how are the articles packed and distributed?

1. Max dimensions: 60 cm x 40 cm x 10-50 cm is your friend

2. Avoid outer packaging– use only if the articles cannot be packed without

3. Avoid polybags if the volume of the article is above 3 liter. Use a carton instead

4. Avoid black cartons and loose lids

5. Remember item number, order number, barcode and items per carton – and double check master data!

salling group

The Salling Group warehouse is highly automated, making adherence to carton size measurements (Length x Width x Height: 600 mm x 400 mm x 100-500 mm) crucial.

When cartons fall within these measurement limits, they fit into the gray trays on the conveyor belt and can be handled entirely automatically, which is highly efficient and cost-effective.

However, if cartons exceed these measurements and do not fit into the gray trays, they must be handled manually, leading to increased costs.

Please contact the relevant buying department if the goods/garments cannot meet these requirements. We can then discuss how to ensure cost efficiency and effectiveness for all parties involved.

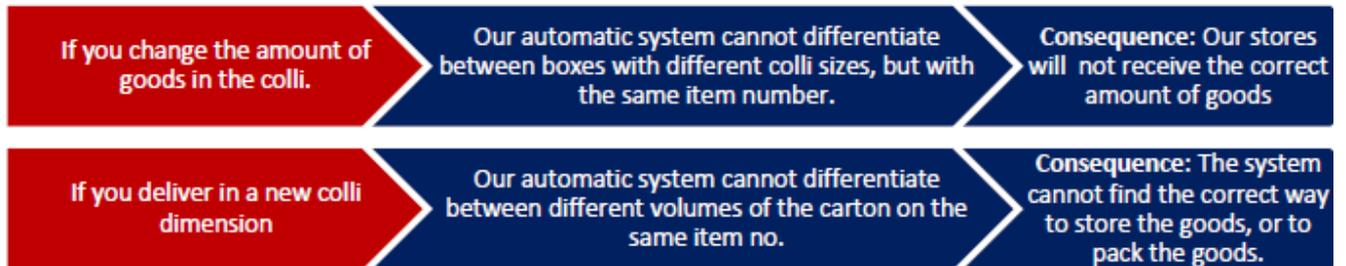

18.2 TYPICAL PACKAGING MISTAKES

Kindly go through the following points thoroughly, in order to avoid these mistakes.

18.2.1 BREACHES UNIT

A breached unit is a carton that does not contain the same amount of goods as the other delivered units on the same item no. It is very important that you do not deliver breached units. Salling Group has a highly automated central warehouse, and all items with same article number must have identical data.

Supplier can find the correct required unit quantity in the assortment overview on the order sheet.

18.2.2 INCORRECT DIMENSION INFORMATION

It is very important to always be accurate regarding dimensions of the cartons delivered. Carefully make sure to fill in the Masterdata sheet correct.

Kindly find the Masterdata sheet via the Dropbox link:

https://www.dropbox.com/s/t6yelt9o2wv3oqm/DFS_ENG_TEX.xlsm?dl=1

18.2.3 PRODUCTS IN POLYBAGS

It is very important that products packed in polybags are not to exceed the limit of 3 liters. For further information kindly see the packing instructions – can be found via <https://sallinggroup.com/en/contact/suppliers>.

Example: We receive 10 t-shirts in a plastic bag with the dimensions 400*300*200 mm (L*W*H). This product has a volume of 24 liters and will therefore reduce the amount of articles in our shop totes and increase the handling time in the warehouse and our stores.

Consequence: We must handle the product as small even though the measurement indicates that it is medium.

Solution: This type of products should be delivered in a medium carton instead of a plastic bag.

18.2.4 THE SHIPPING CARTON IS SLIGHTLY TOO BIG TO BE MEDIUM

Example: We received jackets in a carton with the dimensions 630*470*200 mm (L*W*H). The width of the carton is in this example defined by the width of the hanger. This carton is 3 cm too long and 5 cm too wide and is therefore classified as a large carton. (Large cartons are approximately 2 times more expensive to handle in our warehouse than medium cartons)

Solution: If the jackets had been folded on the middle, the carton would have been the following size 470*400*400 mm, and it would now be classified as medium. (The longest side is now equal to the side which was earlier the width because the jackets are now folded)

18.2.5 OUTER PACKAGING / RECEIVING UNIT

Outer packaging should generally not be used for textiles. Only in cases where the end garment is sold in some type of packaging – e.g. shoes.

- Please note our requirements regarding outer packaging/receiving unit:
 - Should only be used for small export units to reduce handling time and shipping cost.
 - Should only be used when the number of export units / shipping units exceeds 5.
 - Only one item number per outer carton
 - Only one level of outer packaging is acceptable.
 - Kindly see the packing instructions for further information.

For detailed information concerning subjects such as listed below, kindly see the “Packing instructions – Nonfood”.

- Definitions of cartons
- Handling types and dimensions
- Dimensions of the box – recommendations
- Carton & pallets
- Carton marking

19 MOLD

19.1 POLICY

Supplier is responsible for avoiding mold spores in any product delivered to Salling Group.

Please note: It is banned to import and sell textiles containing DMF (dimethyl fumarate).

Supplier is responsible for correct packing of product and prevention of mold formation.

19.2 MEANS FOR PREVENTION OF MOLD

Salling Group Textile prefer the use of Micro-Pak® (<http://www.micropakltd.com>).

- garments – please use Micro-Pak® or Silica Gel Bags.
- lambswool – please use Micro-Pak® PE sheets.
- shoes and bags – please use Micro-Pak® – Silica Gel Bags are not allowed.

We suggest Dri Clay kraft desiccants (<https://www.micropakltd.com/en/products/micro-pak-dri-clay>) or PE Sheets for goods packed in Polybags (<https://www.micropakltd.com/en/products/micro-pak-pe-sheets>)

19.3 REQUIRED DOCUMENTATION

Supplier must be able to send the following certificates/documents by request:

- Documentation for certainty of original products (e.g., Micro-Pak).
- Material Safety Datasheet for Silica Gel Bag (to avoid harmful substances inside).

19.4 MICRO-PAK® AND MICRO-PAK® PE SHEET USEFUL FOR GARMENTS, SHOES AND BAGS

Micro-Pak® stickers and sheets must exclusively be purchased directly from Micro-Pak or other authorized distributors.

To secure original Micro-Pak® please make sure to choose supplier from Micro-Pak® list. They can be found here: <https://www.micropakltd.com/en/worldwide-distributors>

Please check under “INSTRUCTIONS FOR USE” which Micro-Pak® product (sheet, sticker etc.) is correct for your product and packing – if in doubt please contact Quality Department or find instructions (<https://www.micropakltd.com/en/instructions>).

Micro-Pak® Stickers comply with the restricted substance policies of major retailers and brands through the world. Micro-Pak® Stickers have also undergone stringent safety testing as part of our registration with the US Environmental Protection Agency (EPA).

19.5 SILICA GEL BAGS USEFUL FOR GARMENTS ONLY

Salling Group Textile accepts the use of Silica Gel Bags for garments, if the above documentation is in hand. Please contact Quality Department if in doubt.

19.6 MOLD CLEANING

If mold occur in/on any product sold to Salling Group Erren Recondition BV is to be used for removing mold from received shipments. Link to webpage: [Erren Recondition](#).

For all work (repair, finishing VOC-Volatile Organic Compounds/smell reducing etc.) we send a quotation with a fix-price. Only in mold cases we quote a from/till price. The reason for this is, that it is hard to see how heavy infected a product is through the whole shipment.

Supplier will pay all costs regarding mold cleaning.

19.7 PROCEDURES AFTER CLEANSING

Salling Group accepts products which are cleaned/cleansed, but it is hard to guarantee that all tracks of mold are removed. Mold will be able to grow back under the right temperature and humidity.

Proposed precautions to be taken:

1. Store cleaned / purified products from all orders in all colors in house for observation.
This will allow us to stay ahead and act sooner if there is a development of mold on the products.
2. The supplier must pay for any cleaning/cleansing/treatment, transport etc.
We reserve the right to return the goods - even later if it turns out that the mold is returned.
3. If we accept to continue to do business with the supplier - they must confirm that they will initiate and pay "MOLD-AUDIT" with Micro-Pak® or Bureau Veritas, and afterwards initiate the actions suggested during this audit.

The use of substitute and counterfeit stickers or sheets is not allowed and is subject to charge backs. Use of silica gel packets for shoes/bags or use of counterfeit Micro-Pak® stickers within product packaging is not acceptable.

Breach of any of the above entitles Salling Group to cancel the order or can result in penalties and chargebacks.

20 CLAUSE OF TRANSPORTATION

20.1 FOB ORDERS

- For FOB orders departing from **China** transport must be booked via our nominated forwarder Maersk. Supplier must contact Maersk Chengdu office for booking. Email address is salling.cn@lns.maersk.com.
- For FOB orders departing from **Malaysia, Taiwan, Vietnam, Thailand, Pakistan, Indonesia, India and Bangladesh** transport must be booked via our nominated forwarder DHL (DHL Order Management Solutions). Supplier must contact Gary Lee; email: garykw.lee@dhl.com unless supplier is already onboarded DHL system for Salling Group orders whereas supplier must contact local DHL office as previously.
- Shipping is subject to Salling Group's written approval of a shipping test.
- Part deliveries, part invoicing and back orders are subject to prior written agreement with Salling Group.
- If delivery on time proves impossible by vessel, the goods must be transported by air freight at the Supplier's expense ('DAP Aarslev' as incoterm). See section 1.3 for further information.

20.2 ALL SUPPLIER'S WITH INCOTERM FOB

- FOB Forwarder Maersk/DHL:
 - It is shipper's/supplier's responsibility to book orders with Maersk/DHL.
 - Book in Maersk/DHL portal – login can be acquired from
 - **Maersk** Chendu office; email: salling.cn@lns.maersk.com
 - **DHL** direct contact Gary Lee; email: garykw.lee@dhl.com.
 - Booking deadline is always 14 days before ETD.
 - If new login is required for online access to forwarder portal the following is required:
 1. Shipper's + supplier's name
 2. Shipper's + supplier's Address
 3. Contact person
 4. Telephone number
 5. Email address
- Contact information for Maersk/DHL can be acquired from Vareflow or via Booking Exception mailbox in case otherwise needed; emails: vareflow@sallinggroup.com or bookingexceptions@sallinggroup.com

20.3 SHIPPING BY AIR FREIGHT

When shipping out orders to Salling Group by air freight, transport must always be booked through below forwarder:

All countries: Scan Global Logistics

Kindly note that Salling Group's designated transporters must be applied for all consignments. This means that if you are paying the freight charges, the consignment must be booked through Salling Group's transporters. The supplier will be able to ship under Salling Group's rate agreements.

If air freight orders are dispatched through alternative air freight forwarder, Salling Group will charge the Supplier a standard fee of DKK 10.000.
